The Population and Housing Census of Maldives is the largest national statistical exercise and provide the most comprehensive source of information on population and households. Maldives has been conducting censuses since 1911 with the first modern census conducted in 1977. Censuses were conducted every five years since between 1985 and 2000. The 2005 census was delayed to 2006 due to tsunami of 2004, leaving a gap of 8 years between the last two censuses. The 2014 marks the 29th census conducted in the Maldives.

Census provides a benchmark data for all demographic, economic and social statistics in the country to the smallest geographic level. Such information is vital for planning and evidence based decision-making. Census also provides a rich source of data for monitoring national and international development goals and initiatives.

Data from various censuses serve as a comparable basis reflecting the achievements of past policies carried out by the government for the benefit of the people. The results of the census will provide essential data for decision makers, policy planners, international agencies and the business community in assessing the progress of the last few decades and in planning the future spectrum of development.

I am greatly indebted to the general public for their support and cooperation to the census. I thank each and every individual, who responded to the census and made possible this valuable data set. I hope that the experienced data users, as well as students and the wider public, will find it useful.

My acknowledgement and appreciation goes to the hard work of each and every individual who were involved and contributed to the census data collection management, processing and dissemination.

I am grateful to development partners for their generous financial support and the consultants for their technical support.

Finally, the success of this census is attributed to the concerted effort and dedication of the management and staff of the National Bureau of Statistics and I would like to take this opportunity to thank them wholeheartedly.

Abdulla Jihad

Minister of Finance & Treasury

INTRODUCTION

The preliminary results of the population and housing census 2014 were released on 5 November 2014. This included the population by sex at island level, based on the daily records used during census operation.

This publication presents the final results of the 2014 Population and Housing Census. It contains the information on the population by age and sex and households by type, at atoll and island levels.

Data collected in the census include a wealth of information: population size, age, sex, citizenship, religion, migration, education, economic activity, marital status, and housing. Information on the living arrangement of children and elderly population was also collected. The detailed reports by various themes will be disseminated subsequently.

The 2014 census is making a substantial change in the population that is included in the census, thereby moving closer to the international recommendations for census taking. According to the international recommendations, only the population residing in the country should be included in the census. In our past censuses, foreigners residing in the Maldives were not included in the census while we include Maldivians residing abroad. The Maldivians residing abroad were also included in the 2014 census to enable comparison with previous censuses.

Census 2014 data introduces the concept of 'Resident Population' consisting of Resident Maldivians and Resident Foreigners, which will form the coverage of future censuses. Due to the numerous difficulties and challenges posed in enumerating the foreign population, there is an under coverage of this population, when compared with administrative records.

However, in order to allow comparisons with previous censuses the concept of Maldivian population is also used. This includes Maldivians residing in Maldives as well as those residing abroad. It is our intention to exclude the non-resident Maldivians from the future censuses. The coverage of Maldivians living abroad is not complete, due to the many challenges posed in their enumeration.

The Maldives Population and Housing Census were carried out from 20 to 30 September 2014 and a total of 3,588 personnel were involved in the census operation throughout the country. Census covered 188 administrative islands, 109 resorts and 128 industrial and other islands of the country.

Data Processing of 2014 Census was carried using Intelligent Character Recognition (ICR) and Optical Mark Recognition (OMR) method. Data consistency checking and editing has been done using scientific methods available, with support from international experts in this field.

ACKNOWLEDGEMENTS

This publication has been made possible by the dedicated support of everyone involved in the organization and conducting of the census, from government staff in various ministries and offices to volunteers from public and private sector organizations. Through their dedication and hard work in their respective roles as Officials, Atoll Coordinators, Atoll Technical Advisors, Supervisors, Enumerators, and Data processing staff, this exercise was executed as planned.

We thank each and every Maldivian and foreigner, who responded to the census and provided their valuable information to our census enumerators.

In accomplishing this task, the National Bureau of Statistics owes a debt of gratitude to all those who contributed their time and effort in making this census a success.

We would like to express our gratitude to the United Nations Population Fund (UNFPA), United Nations Children Fund (UNICEF) and World Bank for their generous Technical support. We would like to the international consultants who provided their technical support.

The National Bureau of Statistics acknowledges the support of the Government, for providing necessary funding and support for the execution of this nationwide operation.

Glossary of Terms and Definitions

Term	Definition
Total Enumerated Population	This is the total population enumerated in the census. It includes Usual Resident Population and Non Resident Maldivian Population
Total Resident Population	Population who have lived or intends to reside in Maldives for 1 year or more. This includes Resident Maldivian Population and Resident Foreign Population.
<i>Resident Maldivian Population</i>	Maldivians who have lived or intends to reside in <u>Maldives</u> for 1 year or more
<i>Resident Foreign Population</i>	Foreigners who have lived or intends to reside in <u>Maldives</u> for 1 year or more
Total Maldivian Population	Includes Usual Resident Maldivians and Non Resident Maldivians
Non Resident Maldivian Population	Maldivians who have lived or intends to reside <u>abroad</u> for 1 year or more
Locality	Refers to broad geographic level such as Republic, Male', Atolls (including Administrative islands, Non- Administrative islands)
Administrative Islands	The administrative Islands in the 20 administrative atolls. Male' is also an administrative island.
Non- Administrative Islands	Non-administrative islands include tourist resorts, industrial islands and islands used for other purposes.
Sex Ratio	Number of the Males per 100 Female in the population (Males divided by Females x 100)
Average Annual Growth Rate	The average annual growth rate of the population between two censuses
Household	A household refers to a unit where people live within the same arrangement, usually sharing the same living space, live and eat together. Those whose sleeping arrangements are different from where they take their meals, are counted in the household where the sleeping arrangements are made.
Maldivian Household	Households headed by a Maldivian or households where all members are Maldivian

INTRODUCTION

This Statistical Release discusses the basic demographic characteristics of the 'Total Maldivian Population' enumerated in 2014 Census looking into its changes over time. References will be made to Resident population too. The Foreign population will be looked into only in 2014 census, as this is the first time foreign population has been covered.

The chapter starts with a brief description of the historical demographic change and growth in population. It describes the population distribution across country, looking into administrative and non-administrative islands. Analysis of in-habited islands, according to population size, will be done to illustrate the changing pattern of population dispersion in the Maldives. Comparison is done with previous Census years, to signify the changes over time.

Apart from population count, growth rate and their geographic distribution, information on age and sex is one of the most important result of a census. Age-sex structure is important for policy and planning decisions for the provision of goods, information and service for the various age cohorts. The study of the sex composition of the population is useful for understanding the past trends of demographic dynamics of any society.

In addition to population this release also looks into the total resident household, type of housing unit and average household size.

POPULATION

The total population enumerated in Census 2014 is 407,660. It is worthwhile to note that up to 2006, Maldives census covered only the local population. For the first time, in Census 2014 distinction was made between the resident population and non-resident population. Hence, for analytical purposes, reference to respective population would be made as given below in Table 1 (also refer to Glossary).

Table 1: Total Population Enumerated in Census 2014, by Sex

Population	Both Sexes	Male	Female
Total Population	407,660	230,453	177,207
Resident Population	402,071	227,749	174,322
Maldivian	338,434	171,962	166,472
Foreign 1_/	63,637	55,787	7,850
Non-Resident Maldivian	5,589	2,704	2,885

1_/ Foreign population enumerated in Census 2014 is less than the official figures recorded in Immigration documents

Of this total, the Resident Population is 402,071, which consist of 338,434 as Resident Maldivians and 63,637 foreigners. Census 2014 captured 5,589 Maldivians as living abroad, and hence following the notion of previous censuses, the 'Total Maldivian Population' enumerated in Census 2014 was 344,023.

Between 2006 and 2014, the total Maldivian population increased by 45,076, a 15 percent increase from 2006. Due to the difficulties in enumerating the non-resident Maldivians, there is an under coverage of this population.

As per the international recommendations, census should only cover the resident population of the country. Hence, it is advisable to exclude the Maldivians living abroad in future censuses.

Table 4 shows the growth rate for total Maldivian population in administrative islands excluding Male'. The highest growth rate was for the period 1985-1990, and which gradually declined over the following years. The period 2000-2006 showed a negative growth rate which might have been due to the out migration of working population to Male', resorts and industrial islands. 2014 census showed a growth in Atoll Population from 2006 to 2014.

Table 4: Population growth rate for Total Maldivian Population in administrative islands (excluding Male'), 1990-2014

Administrative islands in Atolls	Population Growth Rate				
	1990	1995	2000	2006	2014
	3.3	2.84	1.25	-0.33	0.78

The change in population levels during the last two decades varies significantly among Atolls. Table 5 shows the change in population among Atolls between 2006 and 2014. As the population growth in the atolls was negative between 2000 and 2006, majority of the Atolls showed a decrease in population. In 2014, the pattern showed an increase in the Atoll population with Male' Atoll (K), North Ari Atoll (AA) and South Ari Atoll (ADh) Atolls experiencing a huge influx of population. This is expected as majority of the Tourist resorts are located in these Atolls and it attracts settlements in these administrative islands.

Table 5: Maldivian Population by Atolls for 2006 & 2014 and percentage change.

Atolls	2006	2014	Percent Change
North Thiladhunmathi (HA)	13,314	13,004	-2.3
South Thiladhunmathi (HDh)	16,214	18,570	14.5
North Miladhunmadulu (Sh)	11,830	12,127	2.5
South Miladhunmadulu (N)	10,015	10,556	5.4
North Maalhosmadulu (R)	14,643	14,934	2.0
South Maalhosmadulu (B)	8,893	8,919	0.3
Faadhippolhu (Lh)	8,346	7,996	-4.2
Male' Atoll (K)	10,149	12,232	20.5
North Ari Atoll (AA)	4,855	5,915	21.8
South Ari Atoll (ADh)	6,921	8,183	18.2
Felidhu Atoll (V)	1,502	1,622	8.0
Mulakatholhu (M)	4,654	4,711	1.2
North Nilandhe Atoll (F)	3,662	4,140	13.1
South Nilandhe Atoll (Dh)	4,720	5,329	12.9
Kolhumadulu (Th)	8,451	8,923	5.6
Hadhdhunmathi (L)	11,743	11,841	0.8
North Huvadhu Atoll (GA)	8,007	8,477	5.9
South Huvadhu Atoll (GDh)	10,991	11,653	6.0
Gnaviyani (Gn)	7,636	8,095	6.0
Addu Atoll (S)	17,862	19,829	11.0

Compared to 2006, population declined in 2 Atolls, in 2014; the highest decline was recorded in Faadhippolhu (Lh) Atoll followed by North Thiladhunmathi Atoll (HA). The same pattern is also seen in 2006 Census for the period 2000-2006 for these Atolls. The observed changes within the Atolls are closely linked with the number of people migrating to Male' and resorts.

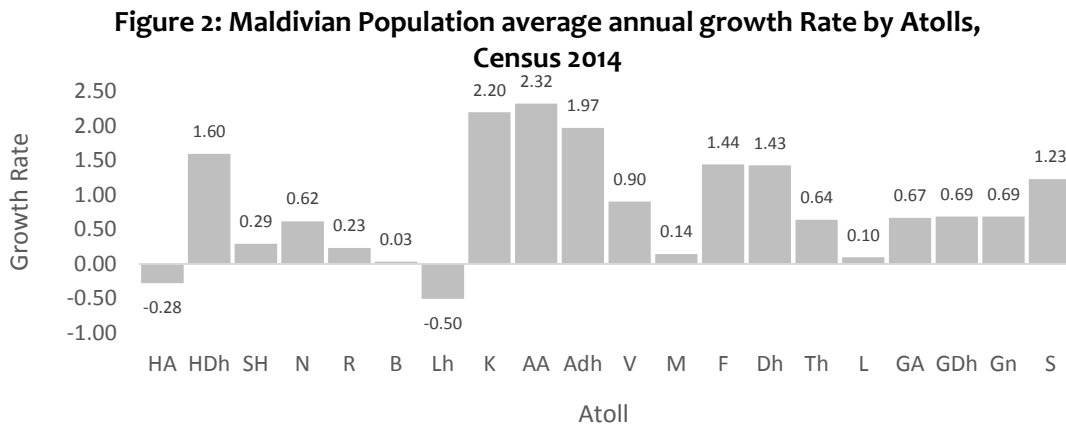

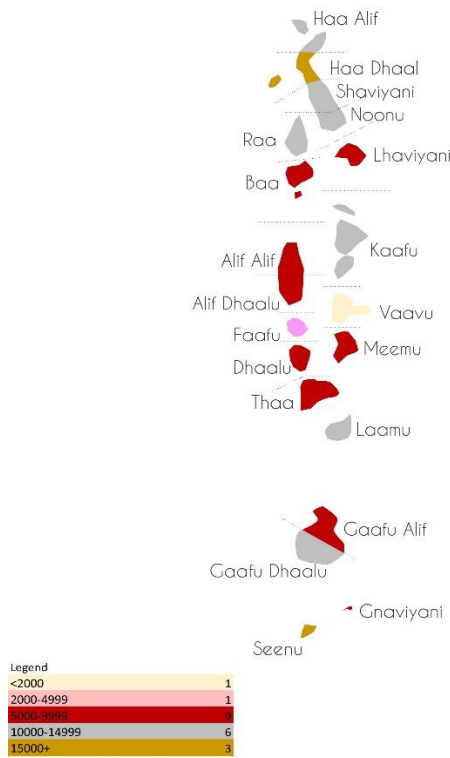

Figure 2 shows the average annual growth between 2006 and 2014 censuses in the administrative islands in Atolls, for the Total Maldivian Population. Except for Male' Atoll (K), North Ari Atoll (AA) and South Ari Atoll (ADh), the average annual growth rates of all atolls were below the national annual growth rate of 1.65 per cent (see Figure 5). HA and Lhaviyani Atoll population growth continued to be negative while the population has increased in rest of the Atolls.

Resident Population in Administrative islands:

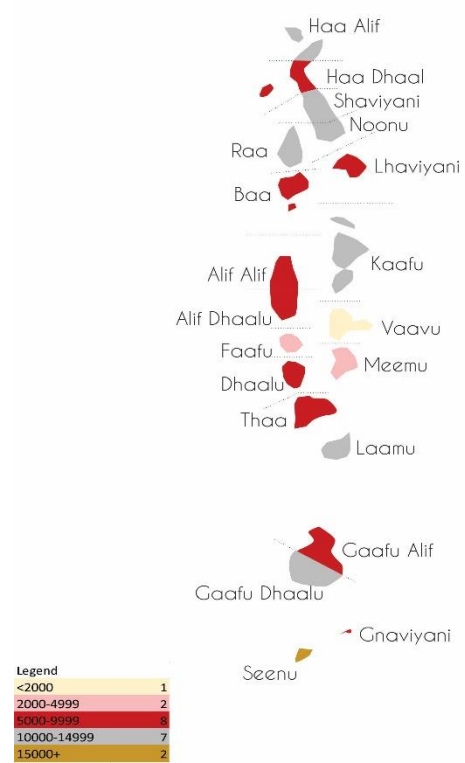

Census 2014 enumerated population by place of usual residence and the following Chart 1 presents the population in 20 administrative Atolls grouped into population sizes. The resident population consisting of Resident Maldivian and Resident Foreigners is highest in Addu City. While the same pattern prevails for the resident Maldivian population, the highest foreign population is reported in Addu City and Male' Atoll.

Resident Maldivian population in the administrative islands in the Atolls ranged between 1,601 in Vaavu Atoll to 19,319 in Addu city. The Resident Maldivian population is distributed within the range of atoll population size 5,000-9,999. Eight Atolls fall in this category. Only Addu city and Hdh Atoll falls in the category of population greater than 15,000 Maldivian residents. Vaavu Atoll, Meemu Atoll and Faafu Atoll has the smallest populations which falls below a population of less than 5,000.

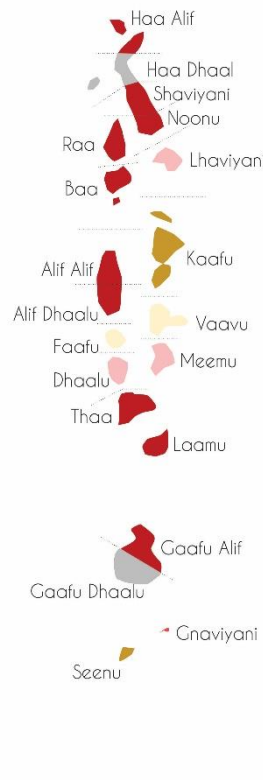

Chart 1: Resident Population by population size class, 2014
Total Resident Population

Resident Maldivian

Resident Foreigners

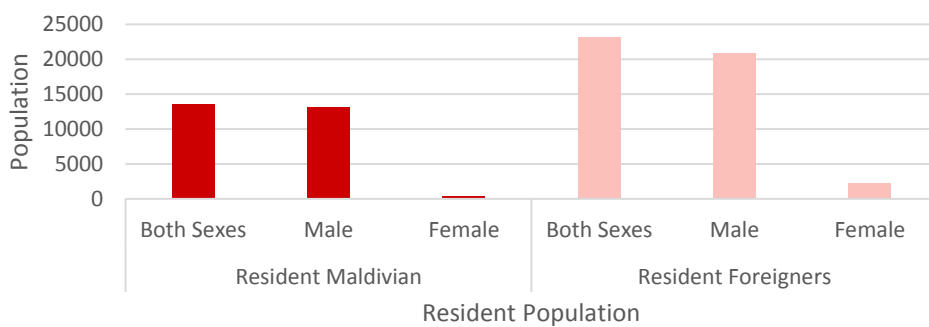

Population in Non-Administrative Atolls:

With the expanding economic development initiatives of the government, the shift of the population from Administrative islands to non Administrative island has increased over the years. As illustrated by Table 3, the Total Maldivian population residing in Non-Administrative islands increased from 4,234 in 1985 to 13,555 in 2014. This owes to increased number of operating resorts, agricultural islands and other ongoing projects in such islands. Population in resort islands accounted for 77 percent of the residents in these islands.

The 2014 Census enumerated the foreign population and recorded a figure of 23,110 foreigners in the non-administrative islands. Interestingly, this total is much higher than the total number of Resident Maldivians enumerated in Non-administrative islands, as shown in Figure 3. Foreigners account for 63 percent of the population of these islands.

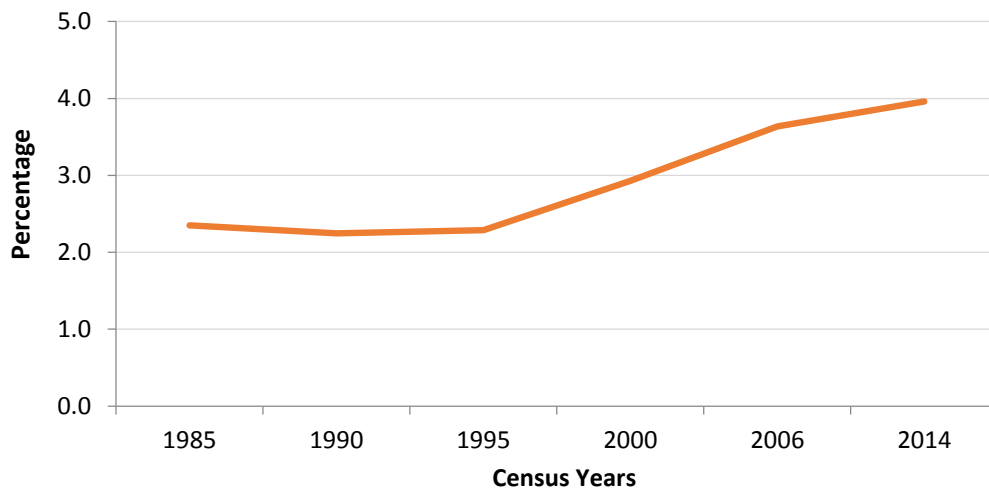

Figure 3 : Resident Population in Non-Administrative Islands, 2014

The population in the Non-Administrative islands are dominated by males. For the resident Maldivian population, only 3 percent of the population in non-administrative islands is composed of females, while it is 9 percent for the foreign females.

Over the past 8 years the population in non-administrative islands grew at a steady rate. Figure 4 shows the increase in the percentage of the Maldivian population living in Non-administrative islands. Since 1995 onwards, the growth has elevated in these islands.

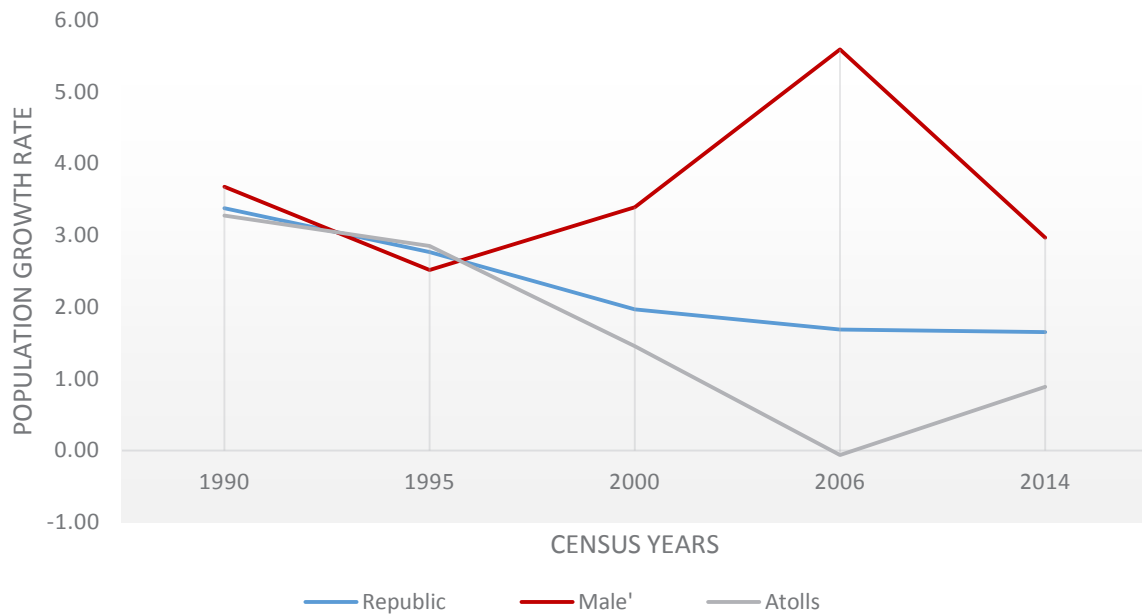

Figure 4: Percentage of Resident Maldivian Population in Non-Administrative Islands, 1985-2014

Population in Male' and Atolls

The Maldives population is vastly distributed across atolls consisting of small islands. Administratively there are 20 Atolls. Though there is no official categorization of urban and rural areas, capital Male' is widely referred to as the urban center and the rest of the Atolls recognized as the rural area. Census 2014 showed that 38 percent of the population lives in Male' the capital, while majority of the population resides in the Atolls. In Maldives, as in other small island states, internal migration and growth of urban area can be attributed to inequalities between the Capital and the rest.

Figure 5 presents the growth rate of the Maldivian population for the Republic, Male' and Atolls. The pattern of population growth rates experienced by Male' and the Atolls varied significantly over the past 5 censuses covering a 24 year period. Between 2000 and 2006 the population growth rate of Male' rapidly increased reaching its peak at 5.59 percent. This was higher than the annual growth rate of 1.69 percent recorded for the country during that period. The Atolls population marked a negative growth rate of -0.06 percent for the period 2000- 2006. Between 2006 and 2014, Male' population grew at a much lower annual rate of 2.96 percent. In the Atolls, the population growth rate increased from negative to positive.

Figure 5: Population Growth Rate by Locality, 1990-2014

Male' population has increased rapidly over the past decades. Male' remained as the country's fastest growing and most populated island. The development of tourism within Male' Atoll, rapidly expanding government and private sector, and establishment of major health and educational facilities in Male', have created significant disparities between Male' and the Atolls. In addition, developments in Male' attracts migration from all parts of the country. It passed the threshold of 100,000 population in 2006, making it one of the most densely populated cities in the world. Today, with the resident population, this rate stand as 65,201 per km² (population density of Male' exclude Hulhumale' and Villinmale').

ISLANDS BY POPULATION SIZE

With development that takes place in the country, there is change in the pattern of population dispersion. The number of administrative islands has changed over the years and in census 2014 there are 188 administrative islands (including Male'). Table 6 presents the number of islands according to population size.

Table 6: Number of administrative islands by size of Maldivian population

Size class (total Maldivian population Size)	Census Years and number of Islands					
	1985	1990	1995	2000	2006	2014
Total	202	202	201	200	194	188
Less than 100	2	1	1	0	5	2
100-199	17	13	11	11	11	5
200-299	29	20	10	15	18	10
300-399	39	30	26	22	18	18
400-499	30	25	27	28	20	21
500-599	19	24	23	19	18	17
600-699	13	19	16	14	12	15
700-799	10	14	16	12	11	15
800-899	6	7	9	13	12	11
900-999	12	8	11	8	6	9
1,000-1,999	17	31	38	42	47	45
2,000-4,999	6	7	9	12	12	16
5,000-9,999	1	2	3	3	3	2
10,000+	1	1	1	1	1	2

According to Table 6, the administrative islands in the country have witnessed a significant reduction in number over the years. The drop in the number of islands in 2006 and 2014 is mainly due to the relocation of population after 2004 Asian Tsunami.

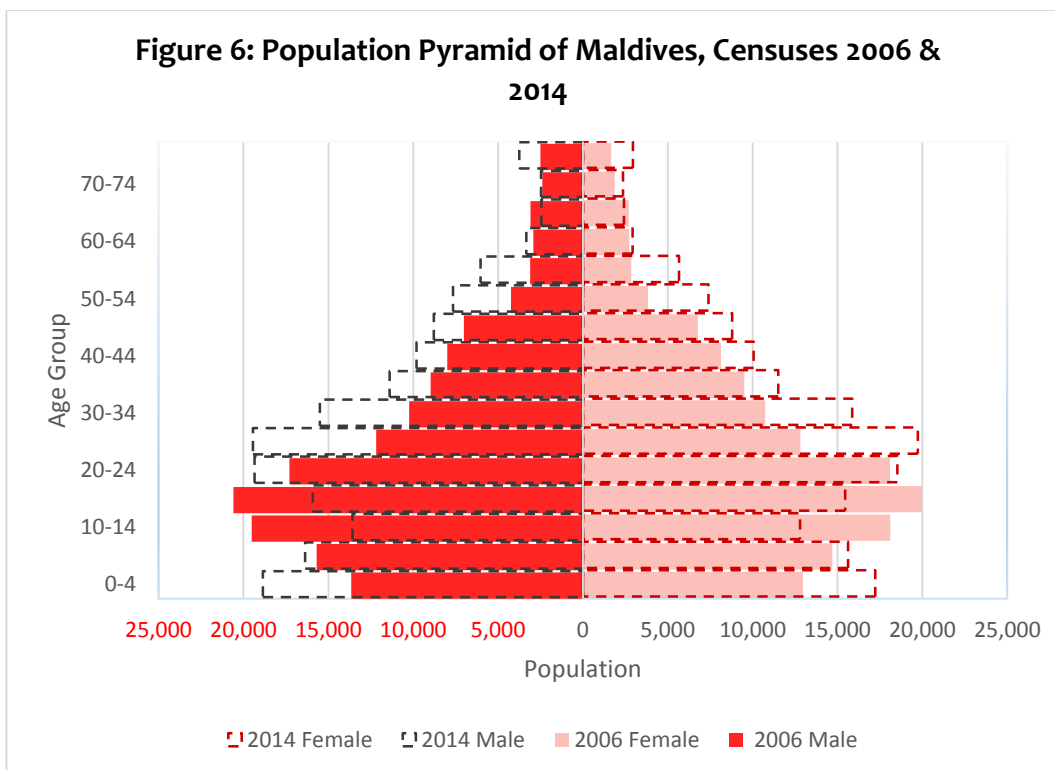

Table 6 reveals that majority of the islands still has a population less than 1,000 people. Islands which hosted a population of 300-399 people has gradually decreased over the years. The category of population size class of 100-199 people has also decreased from 17 islands in 1985 to 5 islands in 2014. In 2014, 123 islands had a population less than 1,000 which accounts to 65 percent of the administrative islands. One important highlight of the table is the size class population of 10,000+, which has remained the same over the years till 2014, with this category including only the capital Male'. In 2014 for the first time, apart from Male', S. Hithadhoo reached 10,398, surpassing the benchmark of 10,000 for the first time.

POPULATION STRUCTURE

The population growth and the changing age-sex composition of the Maldives can be portrayed through the use of population pyramids. The overall shape of the pyramid and size of the bars depict the changes. The population pyramids of the Total Maldivian population for the years 2006 and 2014 are shown in Figure 6.

The general shape of the pyramid have slightly changed in 2014, the increasing fertility rate has led to a broad base. The age and sex composition of the Maldives in 2014 continued to resemble that a developing country with a broad base, a relatively large proportion of people in the adult age categories (below 30 years of age), and relatively small proportion of people in the older age categories (above 60 years).

Even though adult groups still comprised a relatively large proportion of the population, the base of the pyramid took on a more rectangular look in 2014. The increased proportion of the population in older age groups results from the decline in mortality rate at older ages in the recent decades.

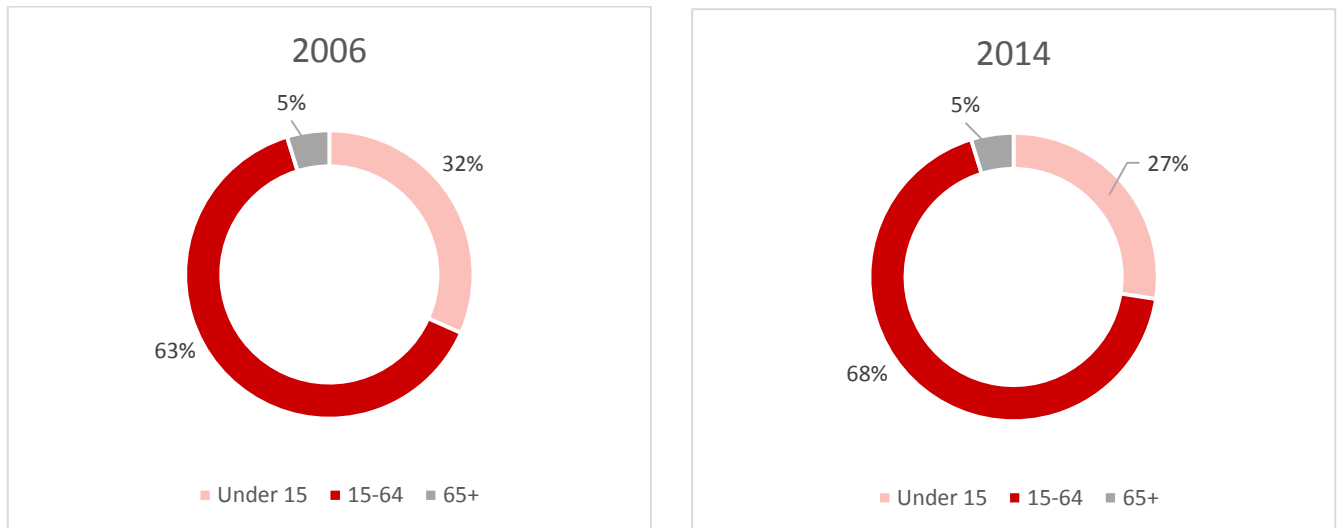

The age cohort of 10 to 14 years is the smallest among the child population in 2014, reflecting on the shift of 0-4 years of population of 2006. In 2014, the pyramid broadens at the youth age, showing a passing demographic window of opportunity of the Maldives population.

AGE DISTRIBUTION

Changes in the age structure illustrated in population pyramids can also be studied through the composition of the population by broad age groups.

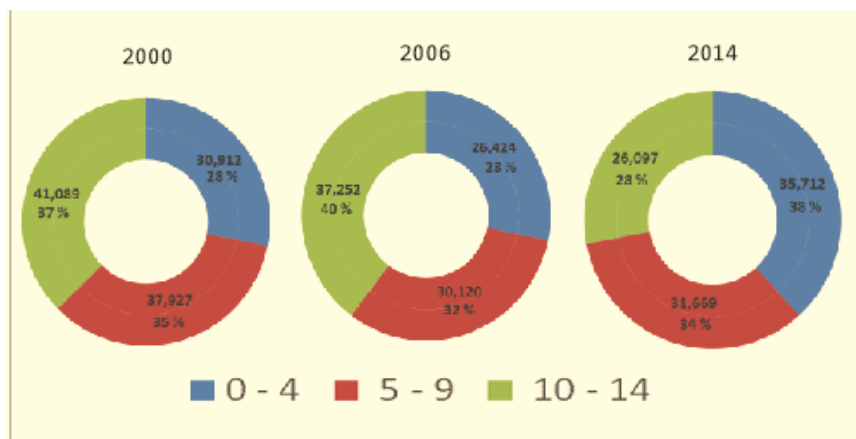

Figure 7: Population by broad in percentage, 2006 and 2014

POPULATION UNDER 15 YEARS

It can be observed from the Figure 7 that the percentage of under 15 population has decreased from 32 percent to 27 percent. There were a total of 93,478 children in this age group, with 45,154 female and 48,317 males.

Figure 8: Age distribution of child population, 2000, 2006 and 2014

The proportion of children in the population also decreased with the decreased in the number of children. In 2000 children accounted for 41 percent of Maldives total population. By 2014, this has decreased to 27 percent. This trend is related to decrease in level of fertility in the mid of 2000s. But in 2014 infants or toddlers with in the age group 0-4 years have noticeably increased from 28 percent (in 2000) to 38 percent (in 2014) of total child population. The children in aged 5 to 9 represent 35 percent and 34 percent of the child population in 2000 and 2014 respectively. The early adolescents (10-14), represented 37 percent of the children population in 2000 compared with the significant decline of 28% in 2014.

POPULATION 15 TO 64 YEARS

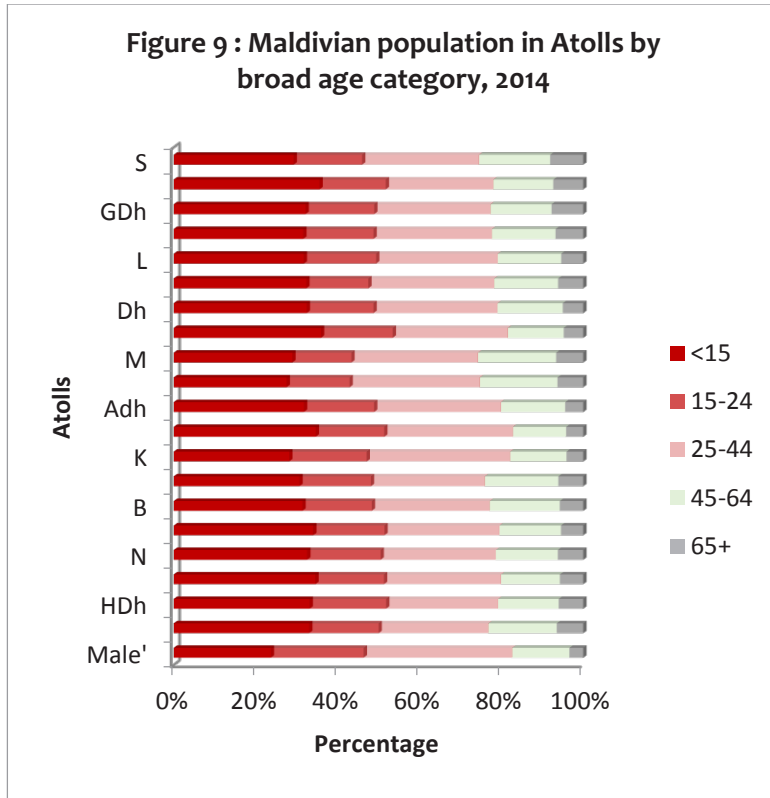

This group comprises 50 single-year age categories, which makes it the largest age range group which includes youth, young adults and mature adults. This is also the source of most economic capacity of every nation. The population aged 15-64 years numbered 228,619 people and made up 68 percent of the population at the time of the 2014 census. This is an increase of 21 percent since 2006 census, when the working age population was 189,443 and represented 63 percent of the total population.

POPULATION ABOVE 65 YEARS

Persons aged 65 and above comprised 5 percent of the total populations in census 2014. There were a total of 16,337 people in this age group, with 8,631 males and 7,706 females. In 2006 the total persons in this age group was 15,729. This figure has remained at a constant level mainly due to the decline in mortality rate. This is due to better health facilities and more awareness and tendency among the people for a fit and happy life.

POPULATION OF ATOLLS AND MALE' IN BROAD AGE CATEGORY

Male' had the largest proportion of people in the age groups 15-64 year, while it had the smallest proportion of children under 15 years (23.7 percent) and people in age 65 and over (3.4 percent).

POPULATION Tables

TABLE PP 1: TOTAL MALDIVIAN POPULATION BY SEX, SEX - RATIO AND INTER-CENSAL ANNUAL POPULATION GROWTH RATE, 1911 - 2014

Census			Maldivians					Sex ratio (males per 100 females)	Avg. annual growth rate (%)
No.	Year	Date	Number			Percent			
			Both sexes	Male	Female	Male	Female		
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1	1911	October	72,237	39,244	32,993	54.3	45.7	119	-
2	1921	March	70,413	38,174	32,239	54.2	45.8	118	-0.27
3	1931	April	79,281	43,235	36,046	54.5	45.5	120	1.18
4	1946	June	82,068	44,308	37,760	54.0	46.0	117	0.23

1_/ The population covered in the census changed between 2006 and 2014. Attempts were made to include resident foreigners in 2014 whereas in 2006, only foreigners married to Maldivians were covered.

2_/ In 2006 relevant questions were not answered by these people and no adjustments were made during editing.

TABLE PP 3: RESIDENT POPULATION BY SEX, NATIONALITY AND LOCALITY (ATOLLS), 2014

HOUSEHOLD

There were a total of 68,249 resident households in the census 2014, out of which 55,949 were Maldivian households and 12,300 as other households. Out of the total households 39 percent of households are in Male' and 60 percent of households are found in administrative islands of the Atolls and 1 percent in the non-administrative islands of the atolls. Figure 10 represents this information.

Fig 10: Percentage share of households , 2014

The types of Household types are divided into 2 categories, which are housing units and collective living quarters. As shown in Figure 11, a nationwide total of 65,765 falls in to the category of housing units. Out of this 97 percent are house/flats/apartments. A total of 2,484 have been recorded as collective living quarters which consist of labour quarters / staff quarters and other collective living quarters. These account for 4 percent of all households.

Figure 11: Percentage share of types of housing unit , 2014

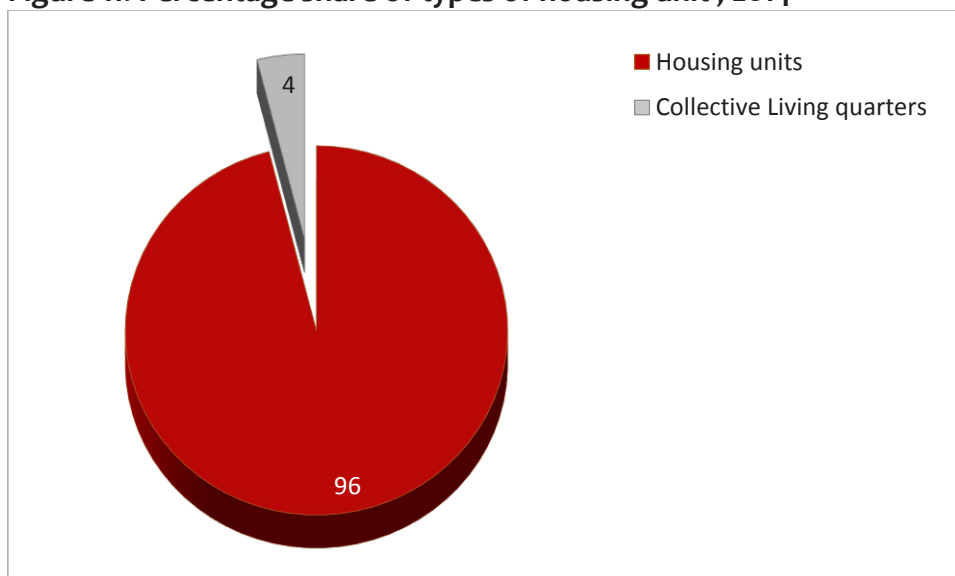

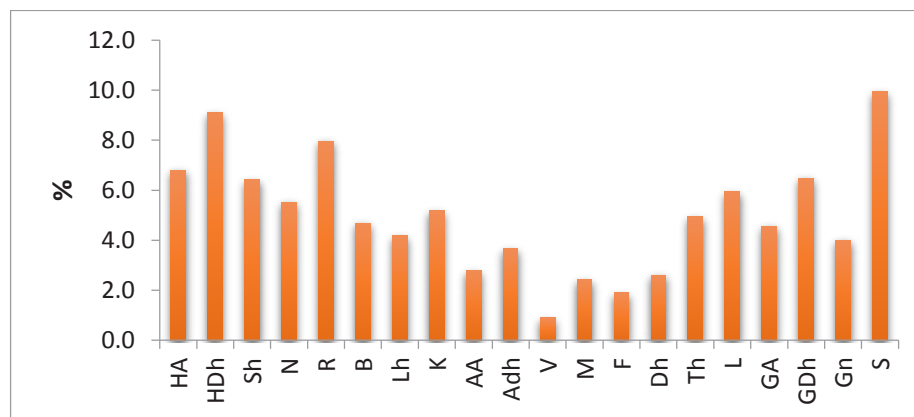

Figure 13: Total Households by type of housing, by locality, 2014
