² /- telecom densities calculated, based on projected mid-year populations, MPND stats yearbooks 2007 and census figures

* From 2011 onwards, (as nationwide mobile phone services were widely used) just the total number of payphones were collected

** Internet subscribers - from year 2010 inclusive of mobile internet customers

Prior to October 2011, 'Fixed Lines' data that we collected included DID's (Direct Inward Dialling) Numbers. From October 2011, DID's are not included as they are not considered as direct lines.

*** From 2010 onwards stopped collecting this data, as these services became obsolete and were no longer provided.

Figure 11.14: Teledensity per 100 people, 2011- 2014

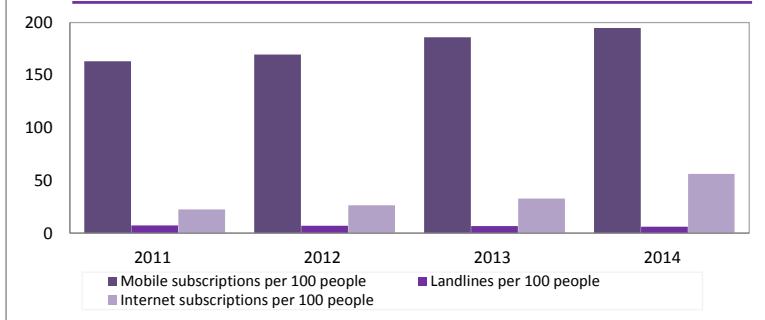

Figure 11.15: Percentage share of mobile subscriptions by type, 2014
