QUARTERLY NATIONAL ACCOUNTS MALDIVES

Base period = 2014

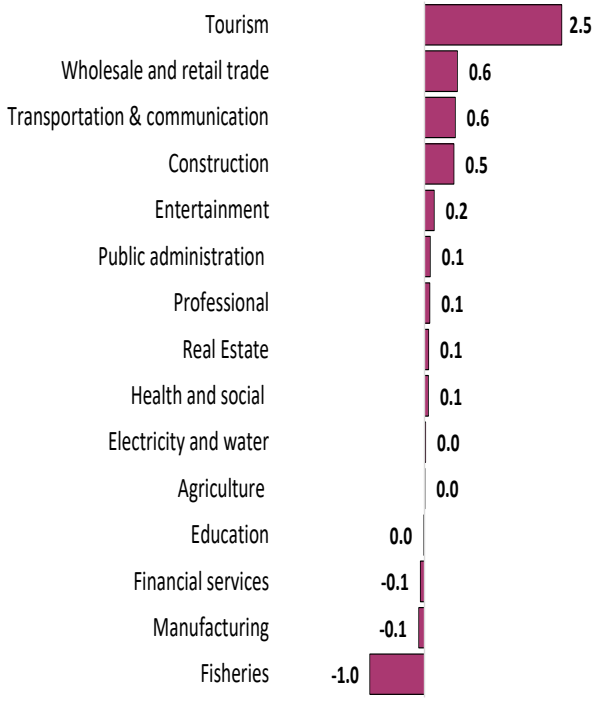
2018 Q3 (July - September 2018)

TIME OF RELEASE: 28TH JANUARY 2019

Table 1: Quarterly Real GDP and percentage changes

Quarter	Real GDP at market price (MVR million)	% change from preceding quarter	% change corresponding quarter, previous year
2016Q1	15,911	6.2	4.0
2016Q2	15,010	-5.7	8.4
2016Q3	15,215	1.4	5.8
2016Q4	16,636	9.3	11.1
2017Q1	16,900	1.6	6.2
2017Q2	15,988	-5.4	6.5
2017Q3	16,311	2.0	7.2
2017Q4	17,911	9.8	7.7
2018Q1	18,976	5.9	12.3
2018Q2	16,947	-10.7	6.0
2018Q3	17,763	4.8	8.9

Figure 1: Contribution to growth (%), 2018 Q3



QUARTERLY GDP SUMMARY

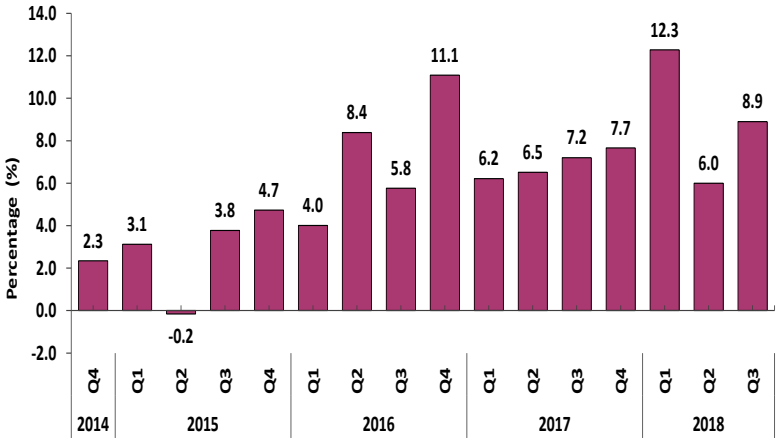
Third Quarter Real QGDP at market prices is MVR 17,763 million.

Table 1 shows a QGDP growth rate of 4.8% for 2018 Q3 when compared to the preceding quarter (2018 Q2). This growth is primarily reflected by the positive contribution to growth from tourism sector 2.5%, Wholesale and retail trade 0.6% , transportation and communication 0.6% and Construction 0.5% sector (Figure 1).

The Maldivian economy is dominated by tourism sector, with tourist arrivals peaking towards the beginning of the year (Q1) and end of the year (Q4), the QGDP of the Maldivian economy also has seasonal effect. Thus, usually GDP growth rate of Q2 is lowest with a negative growth and Q1 is always highest and in Q3 a marginal growth due to picking up in the tourist arrivals.

When compared to the corresponding quarter (2017 Q3), 2018 Q3 shows a growth in QGDP by 8.9%. As shown in Figure 2 below, when compared with the corresponding quarter, over the past four years, the QGDP growth rate is always positive except in 2015Q2 . The downturn in 2015Q2 was due to the fall in tourist arrivals, mainly due to decline in the Russian market.

Figure 2: Growth rate from corresponding quarter (%)



INQUIRIES

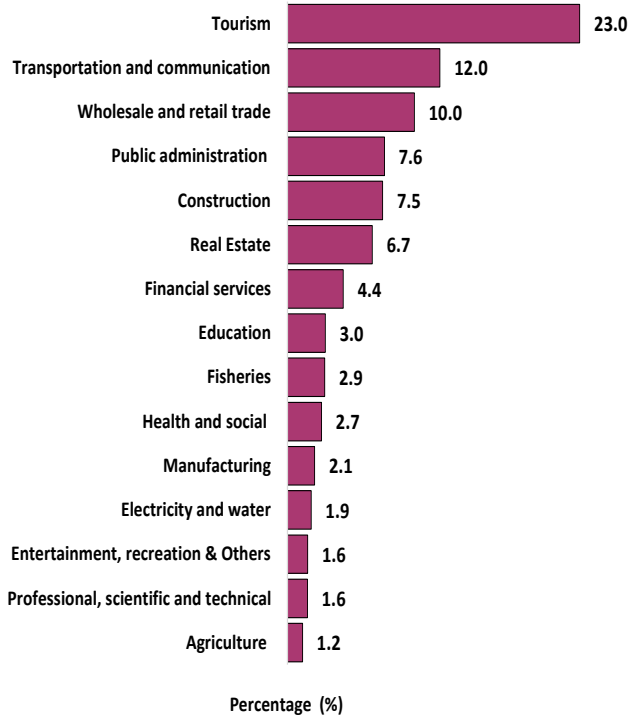
QUARTERLY GDP SUMMARY

Figure 3: Percentage share of Real QGDP (%), 2018 Q3



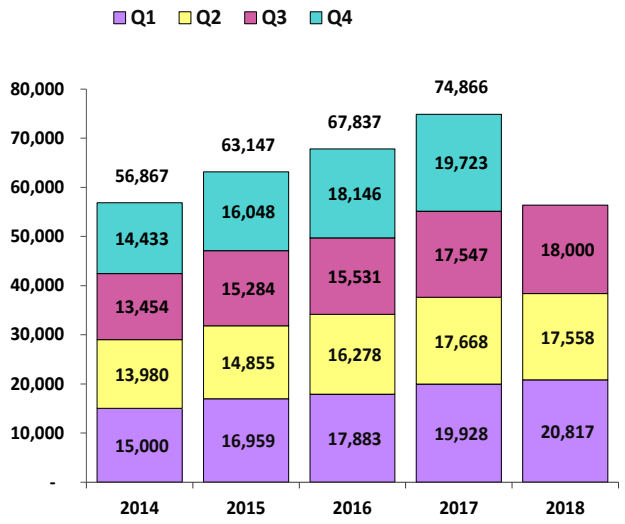
As shown in Figure 3, Tourism sector has the largest percentage share of 23.0%.

Transportation and communication sector is the second largest sector with a percentage share of 12.0% while the third largest is the wholesale and retail trade sector with a share of 10.0%.

Over the past 5 year, due to the ongoing resort construction, infrastructure and housing projects, the construction and real estate sectors are booming, while increasing their percentage share.

Agriculture sector has the lowest percentage share in the QGDP, with 1.2%.

Figure 4: Nominal GDP in MVR millions



As shown in Figure 4, the nominal QGDP for Q3 is MVR 18,000 million. This is a increase of MVR 442 million compared to the preceding quarter (2018Q2).

Annual and comprehensive updates of 2017 GDP was released on 28th October 2018 along with publication of QGDP 2018Q2. Annual updates generally incorporate newly available major annual source data as well as some changes in methods and definitions to improve the accounts.

One of the major improvement made in this revision is improved imports data and tourism bed-nights data of other accommodation establishments (Hotel, Guesthouse and Safaris)

A multiphase development of QGDP by Industry

The data sources used to compile real QGDP has been expanded along with improved methodology. Thus, accuracy of the estimates had improved, particularly in the services sector.

Real QGDP has been rebased to 2014 and will be published with a 4 month lag until the timeliness of critical data sources improve.

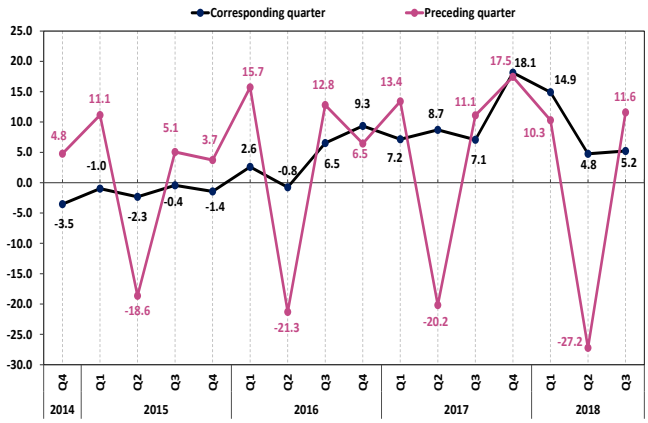
Currently NBS compiles nominal QGDP by industry on experimental basis. However, nominal QGDP series will be published at aggregate level until critical data gaps are addressed.

NBS is also currently compiling the seasonally adjusted real QGDP on experimental basis.

MAIN SECTORS

TOURISM

Figure 5: Tourism growth rate (%)

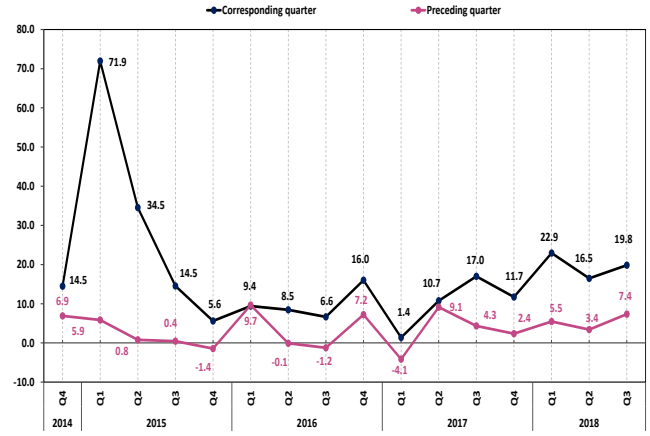


The Q3 GVA of tourism sector is MVR 4,087 million with a growth of 11.6% in Q3 compared to the preceding quarter (2018Q2), due to the increase in tourist bed-nights. The tourist bed-nights of this quarter increased to 2.22 million from 1.98 million in 2018 Q2.

When compared to the corresponding quarter (2017 Q3), Q3 shows a growth rate of 5.2%. The sector had an exceptionally high growth rate in 2017Q4 and 2018Q1.

CONSTRUCTION

Figure 6: Construction growth rate (%)



Q3 GVA of Construction sector is MVR 1,330 million.

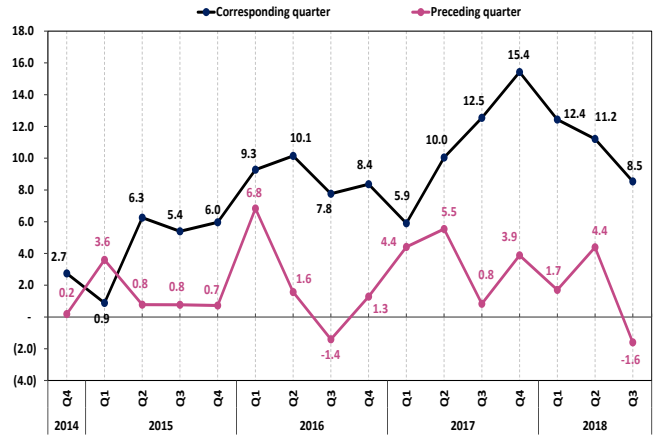
Q3 of this sector shows a growth of 7.4% compared to the preceding quarter, (2018Q2).

However, when compared to the corresponding quarter (2017 Q3), this sector shows a growth rate of 19.8%.The reason for exceptional growth in this sector is due to the increase in new resort development, infrastructure and housing projects.

Improvements to the estimation is done by using UVI in deflating the imports of building materials instead of CMI.

FINANCIAL SERVICES

Figure 7: Financial Services growth rate (%)



Q3 GVA of Financial services sector is MVR 781 million.

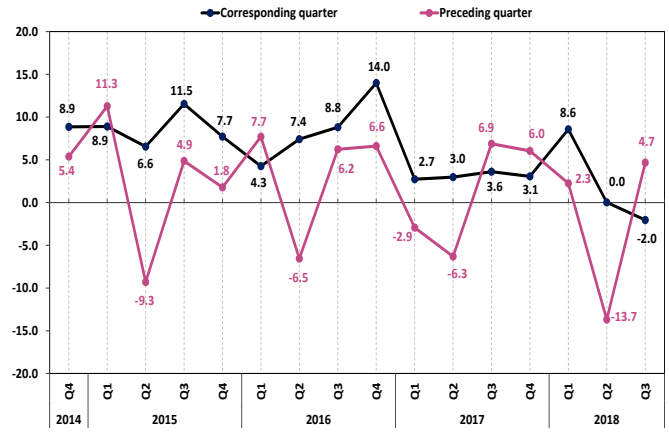
When compared to the preceding quarter, Q3 declined by –1.6% depicting a decrease in financial services.

However, Q3 shows a positive growth rate of 8.5% compared to the corresponding quarter (2017 Q3).

Financial data used for the estimation has been revised for past three quarters.

TRANSPORTATION AND COMMUNICATION

Figure 8: Transportation and Communication growth rate (%)



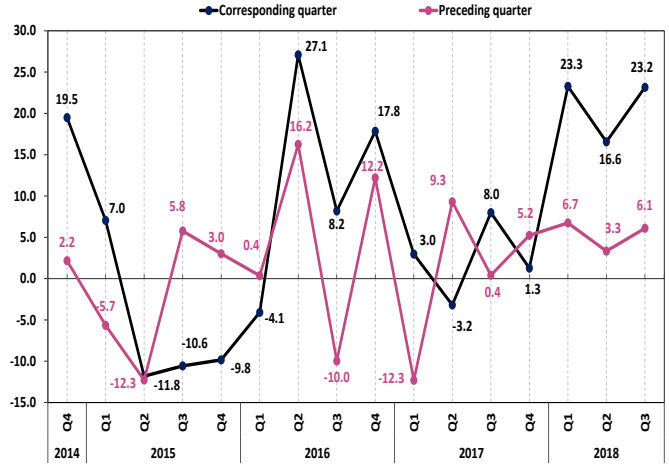
Q3 GVA of transportation and communication sector is MVR 2,132 million.

Q3 shows a growth of 4.7% compared to the preceding quarter (2018 Q2). However compared to the corresponding quarter (2017 Q3), Q2 is decreased by -2.0%.

The increase in this sector is due to the increase in tourist arrivals.

WHOLESALE AND RETAIL TRADE

Figure 9: Wholesale and retail trade growth rate (%)



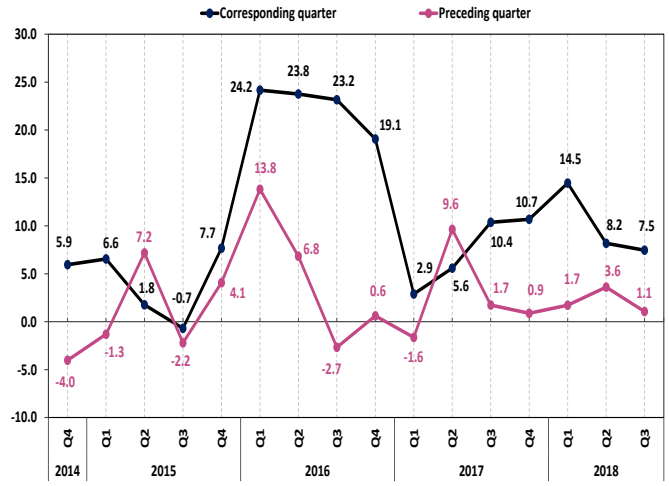
Q3 GVA of wholesale and retail trade sector is MVR 1,775 million.

Q3 shows a growth rate of 6.1% when compared to the preceding quarter (2018Q2). And a growth of 23.2% when compared to corresponding quarter (2017Q3).

As the proxy indicator used for this sector is import of goods, the growth in this sector is reflected by the growth of deflated imports by UVI.

ELECTRICITY AND WATER SUPPLY

Figure 10: Electricity and water supply growth rate (%)



Q3 GVA of electricity and water supply sector is MVR 332 million.

Q3 shows a growth of 1.1% compared to the preceding quarter (2018 Q2).

When compared to the corresponding quarter (2017 Q3), Q3 shows a growth of 7.5%.

The growth of this sector is reflected by the increase in electricity production and water distribution.

REVISIONS ANALYSIS FOR ASSESSING QNA RELIABILITY

Table 2 shows the series of preceding quarter growth rates as published at each release month.

The January 2019 publication (fourth row) shows the fourth estimates of four quarters of 2017, third estimate of first quarter 2018, second estimate of second quarter 2018 and first estimate of third quarter 2018 .

Table 2 . Revisions triangle, preceding quarter growth rate (%)

Revisions triangle

	Reference Quarter						
Release month	2017 Q1	2017 Q2	2017 Q3	2017 Q4	2018 Q1	2018 Q2	2018 Q3
Apr-18	6.5	-7.4	2.2	7.2			
Jul-18	3.9	-6.4	1.7	9.4	7.5		
Oct-18	1.1	-5.4	2.4	9.9	3.2	-10.1	
Jan-19	1.6	-5.4	2.0	9.8	5.9	-10.7	4.8

By column, the revisions triangle shows the revisions history of one specific quarter. For example, the fifth column shows that the initial estimate of 2018Q1 (7.5%) has been revised (3.2%) downward on October 2018 publication and again revised (5.9%) upward on this publication. This quarter was revised primarily due to the revisions of import statistics data.

Finally, the triangle can also be analyzed diagonally. The main diagonal includes all the first estimates of the quarters, the secondary column the second estimates, and so forth.

Table 3 shows the revisions indicators of preceding quarter growth rates. Revisions indicators are calculated as descriptive statistics of a revisions history.

Each statistic aims at measuring a specific characteristic of the revision process. In general, direction, size, and dispersion of revisions are the most salient features of a QNA revisions process.

Table 3. Revisions indicators, preceding quarter growth rate (%)

Revisions Indicators

Revisions	1st estimate (1)	2nd estimate (2)	Revision (3)=(2)-(1)
Reference quarter			
2017 Q1	6.5	3.9	-2.6
2017 Q2	-7.4	-6.4	1.0
2017 Q3	2.2	1.7	-0.5
2017 Q4	7.2	9.4	2.2
2018 Q1	7.5	3.2	-4.3
2018 Q2	-10.1	-10.7	-0.6
2018 Q3	4.8		
a. Mean Revision (MR) =			-0.8
b. Mean Absolute Revision (MAR) =			1.9
c. Standard Deviation of Revision (STDR) =			2.4
d. Range of Revision (RR) =			6.5

a. *Mean Revision (MR)* *is a measure of direction of revisions. A MR value close to zero indicates that there are no directions in the revisions. When the MR is positive, the preliminary estimate is on average below the later estimate (downward bias); when the MR is negative, the preliminary estimate is on average above the later estimate (upward bias).*

b. Mean Absolute Revision (MAR) *is a simple average taken in absolute values. The MAR disregards the sign of revisions. It can be zero when positive, and negative revisions perfectly offset each other. The MAR is a measure of the size of revisions. The larger the MAR value is, the less reliable the preliminary estimate is compared with later ones.*

c. Standard Deviation of Revision (STDR) *is calculated as the standard deviation of growth rate. It is a measure of dispersion of revisions around the mean value. The smaller the STDR value, the closer are the revisions to the MR value. A high STDR value indicates large fluctuations in the reliability of early estimates between quarters.*

d. Range of Revision (RR) *is the difference between the maximum revision and the minimum revision. Always nonnegative, the RR value provides an immediate quantification of the spectrum of revisions occurred in the past.*

ADDITIONAL INFORMATION

FORTHCOMING ISSUES

Issue (quarterly)	Release date
2018 Q4	28th April 2019
2019 Q1	29th July 2019
2019 Q2	27th October 2019
2019 Q3	26th January 2020

ROUNDING

Any discrepancies between totals and sum of components in this publication are due to rounding.

UPDATING GDP

NBS releases three vintages of the current quarterly estimate for GDP: "Advance" estimates are released with a four month gap and are based on estimates or source data that are incomplete or subject to further revision by the source agency; “second” and “third” estimates are released with a seven months lag and a ten months lag, respectively, and are based on more detailed and more comprehensive data as they become available.

Annual and comprehensive updates are typically released in early October. Annual updates generally cover at least the 3 most recent calendar years (and their associated quarters) and incorporate newly available major annual source data as well as some changes in methods and definitions to improve the accounts.

Comprehensive (or benchmark) updates are carried out at about 5-year intervals and incorporate major periodic source data, as well as major conceptual improvements.

ACKNOWLEDGMENT

The release of QNA was made possible through the TA provided by IMF - South Asia Regional Training and Technical Assistance. IMF- Regional Real Sector Statistics Adviser, Mr. Brooks Robinson and IMF Consultant, Mr. Michael Andrews guided through the compilation.

This publication was prepared by Ms. Aishath Sobaha. The entire process of data collection, updating and verification and compilation has been done by Ms. Aishath Hassan, Ms. Mariyam Shadeena and Ms. Aishath Sobaha in close collaboration with Ms. Aishath Shahuda and line-ministries. Additional indirect support rendered by staff of Price and Economic Statistics Section.
