Aug-23	106.91	0.71	9.03
Sep-23	105.93	-0.92	8.26

In 2023 quarter 3 (Q3), the PPI for monthly utility experienced slight fluctuations (Tab 1, 2). The month-on-month price was positive in all three months of Q3. The growth rate for June 2023 compared to the corresponding month in 2022 was at +8.26%.

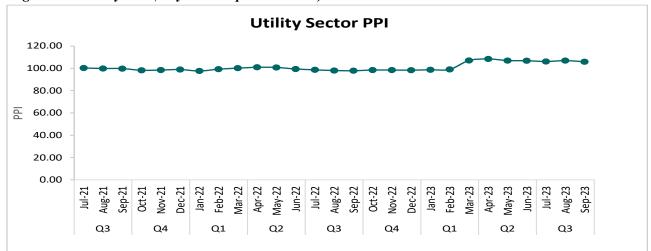

### 2023 Q3 & LONG TERM TREND

The utility PPI consists of Electricity, Water Supply and Waste Management sectors. On the whole, the utility prices remained fairly stable until February 2023 with only minor fluctuations mainly caused by changes in consumption (Fig 1). The monthly utility PPI growth varied between July to September 2023 (Tab 2) at –0.61%, +0.71%, and –0.92% respectively. During the past 2 years, the highest monthly growth occurred in March 2023 at +8.01% due to changes in price of waste management services. The month-onmonth growth has been positive since March 2023, with peak in August 2023 at +9.03% due to waste and electricity prices.

The utility PPI may fluctuate even if the band rates for major sectors remain unchanged as the amount consumed affects the average unit price received by the producers.

### PRICE MOVEMENT IN UTILITY (July 2021-September 2023)

Figure 1: Monthly PPI (July 2021-September 2023)

\*Utility PPI has been updated : electricity -Jan 2019 –Jun 2023 ; and additional utility revision in Jan 2023 -Mar 2023

### **ELECTRICITY PPI — KEY FIGURES 2023 Q3**

Tab 3: Monthly & Month on month change

Jul-23	101.60	-0.57	2.35
Aug-23	102.41	0.80	4.02
Sep-23	101.21	-1.17	3.15

In 2023 quarter 3 (Q3), PPI for electricity experienced some fluctuations. However, the month-on-month growth rate remained positive in all three months of 2023, Q3 (Table 3). The month-on-month growth rate in September 2023 was +3.15%.

### **LONG TERM TREND-Electricity**

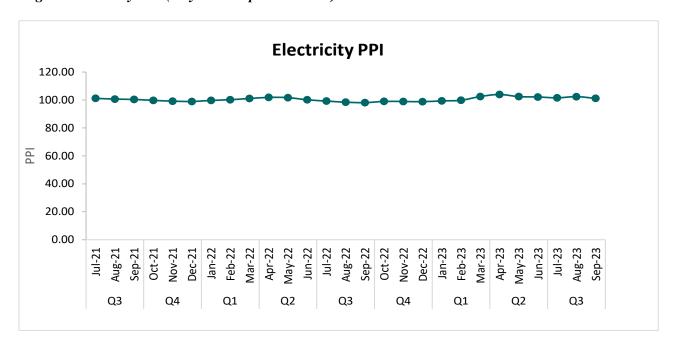

Overall, the electricity prices remained somewhat stable with only minor variations mainly caused by changes in consumption (Fig 2).

The electricity PPI appears to follow a rising trend towards the beginning of the year when the weather is warmest, fluctuating with seasonal changes, and during Ramadan. However, a significant increase of +2.70% occurred in March 2023 due to application of subsidy for all domestic bands.

The Producer Price Index for Electricity is based on unit prices. Thus, electricity PPI may show fluctuations even if the band rates remain unchanged. The PPI for electricity will be affected by the amounts consumed by customers which shift them from one price band to the other, affecting the average price received by the producers.

### PRICE MOVEMENT IN ELECTRICITY (April 2021-June 2023)

Figure 2: Monthly PPI (July 2021-September 2023)

### **Electricity PPI**

10.00 8.00 6.00 4.00 2.00 % change 0.00 -2.00 -4.00 -6.00 -8.00 -10.00 Jul-21 Oct-21 Jan-22 May-22 Jun-22 Jul-22 Aug-22 May-23 Jun-23 Jul-23 Q3 Q4 Q1 Q2 Q3 Q4 Q1 Q2 Q3 % Change over previous month --- % Change - month on month

Figure 3: PPI – Electricity PPI (July 2021-September 2023)

The Figure 3 and table 4 illustrates percentage change in the electricity PPI during the past two years, from July 2021 to September 2023.

The monthly PPI varied between July to September 2023 at -0.57%, +0.80% and -1.17% respectively. The negative growth in September coincides with rainy season, during which some households tend to consume less electricity. During the past two years, the month on month growth in electricity PPI was highest in March 2023, at +2.70%. This is due to introduction of subsidies to all household bands.

The month-on-month prices in 2023 Q3 experienced positive growth between July and September, at +2.35%, +4.02% and +3.15% respectively. This significant positive growth is caused as a result of additional subsidies provided since March 2023 as mentioned above.

The electricity PPI will continue to change with changes in consumption or due to policy changes such as subsidies.

### **WATER SUPPLY PPI — KEY FIGURES 2023 Q3**

Tab 5: Monthly & Month on month change

	PPI – Wat	% Change	
Month	2022	2023	month-on- month

Apr-23	98.17	1.55	1.00
May-23	96.96	-1.23	-0.22
Jun-23	97.02	0.07	0.87
Jul-23	95.93	-1.12	0.04
Aug-23	96.57	0.67	0.61
Sep-23	96.31	-0.27	0.10

In 2023 quarter 3 (Q3), the PPI for water supply also had some fluctuations. Even though the month-on-month prices also experienced some fluctuations, the growth was positive throughout quarter 3 (Table 5). The month-on-month growth in September was +0.10%.

### **LONG TERM TREND-Water Supply**

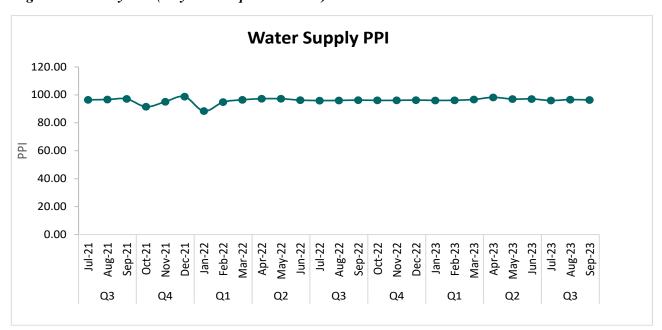

The water supply prices remained fairly stable since January 2022. During the past 12 months (Table 6, Fig 4), the most significant increase occurred in April 2023 at +1.55%. The producers noted that changes in prices are mainly caused by changes in consumption.

The Producer Price Index for Water Supply is also based on unit prices. Thus, the PPI may show fluctuations even if the band rates remain unchanged.

The water supply PPI will also be affected by the amounts consumed by customers which shift them from one price band to the other, affecting the average price received by the producers.

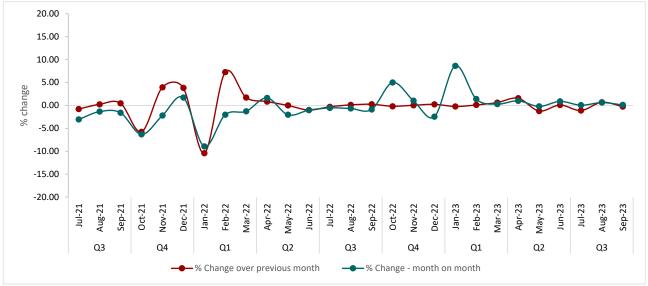

### PRICE MOVEMENT IN WATER SUPPLY (July 2021-September 2023)

Figure 4: Monthly PPI (July 2021-September 2023)

### **Water Supply PPI**

Figure 5: PPI – Water Supply PPI (July 2021-September 2023)

The Figure 5 and table 6 show percentage changes in the water supply PPI during the past two years.

The monthly PPI for water supply varied between July to September 2023 at -1.12%, +0.67%, and -0.27% respectively. As mentioned above, the water supply PPI will continue to change with changes in consumption.

The month-on-month prices also fluctuated throughout the third quarter. Month-on-month growth rates between July to September were +0.04%, +0.61%, and +0.10% respectively.

### **PPI Construction**

Price reference = January 2019 | Index reference = January 2019

May-23*	140.48	0.00	13.95
Jun-23*	140.49	0.00	13.91
Jul-23	140.49	0.00	12.18
Aug-23	140.49	0.00	12.14
Sep-23	140.50	0.00	12.10

In 2023, quarter 3 (Q3), the monthly PPI for Construction sector increased slightly in September. The month-on-month prices between September 2022 and 2023 had a significant increase of +12.10% (Tab 7). This is mainly due to increasing cost of materials and import costs.

### **Monthly & Month-on-Month Changes**

On the whole, construction PPI follows an increasing trend (Figure 7, Tab 8) with some monthly and month-on-month variations as illustrated (Fig 6) below.

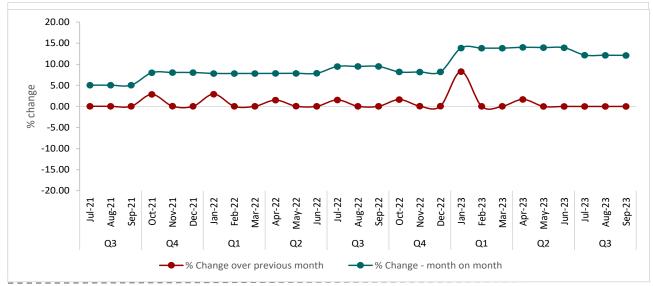

In 2023, quarter 3, the monthly prices remained unchanged. However, the month-on-month prices increased between July and September 2023 at +12.18, +12.14% and +12.10% respectively.

The producers express concern over rising costs in the construction market as higher prices could drive out small businesses since they will not be able to compete with larger farms.

The Construction PPI consists of building construction and road construction, carrying weights of 0.75 and 0.25 respectively. The sample is unique for each outlet depending on the type of construction carried out by each outlet.

### PRICE MOVEMENT IN CONSTRUCTION SECTOR-(Jul 2021-Sept 2023)

Figure 6: PPI Education: Monthly & Month-on-month Percentage Change (Jul 2021-Sept 2023)

### **Construction PPI**

Tab 9: PPI – Construction Types, and Month on month percentage change

Construction Types	Sept-22	Sept-23	% Change month-on- month
Construction	125.33	140.50	12.10
Building Construc- tion	126.33	135.21	7.03
Road Construction	122.33	156.36	27.82

As illustrated in Table 9, over the twelve months, construction prices have increased significantly. The overall construction prices increased by +12.10%, while building construction and road construction increased by +7.03% and +27.82% respectively. These changes occur due to increase in import prices, change in import markets, exchange rates, and so on.

Figure 7: PPI – Construction Sector PPI (July 2021-September 2023)

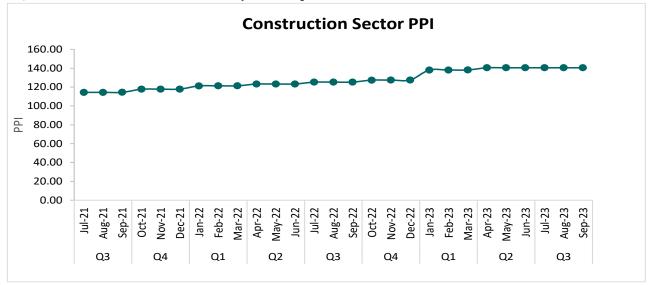

Figure 8: PPI – Building and Road Construction Index (July 2021-September 2023)

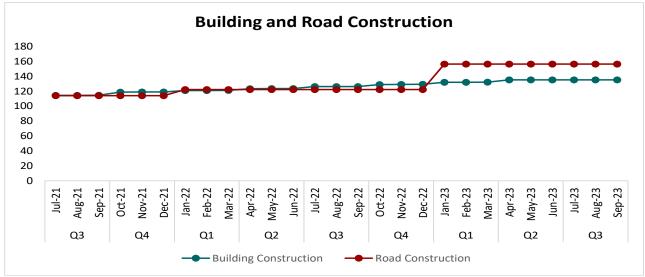

Figure 8, shows the PPI for building and road construction. Although both building and road construction follow an increasing trend, a significant change occurred for road construction in January 2023 with a monthly increase of +27.82% due to increase in cost of raw materials. The monthly PPI for building construction increased by 0.01% in September 2023, while road construction remained unchanged.

### **PPI Resorts**

Price reference = January 2019 | Index reference = January 2019

### **KEY FIGURES 2023 Q3 — PPI RESORT SECTOR**

Tab 10: Monthly & Month on month change

	PPI – F	% Change	
Month	2022	2023	month-on- month

Aug-22	75.88	5.50	2.41
Sep-22	74.51	-1.80	1.73
Oct-22	81.07	8.80	3.27
Nov-22	92.85	14.52	4.31
Dec-22	98.66	6.26	2.11
Jan-23	110.34	11.84	2.59
Feb-23	110.04	-0.28	6.47
Mar-23	108.00	-1.85	4.75
Apr-23	95.11	-11.94	-6.02
May-23	77.33	-18.69	2.35
Jun-23	76.11	-1.58	7.15
Jul-23	77.56	1.91	7.84
Aug-23	81.32	4.85	7.18
Sep-23	79.53	-2.21	6.73

In 2023, quarter 3 (Q3), the PPI for resort sector experienced some fluctuations. Compared to 2022 Q3, prices are high in 2023 (Table 10), with July being at the peak (+7.84%). These changes occur due to changes in demand, and offers provided to attract customers.

### **LONG TERM TREND-Resorts**

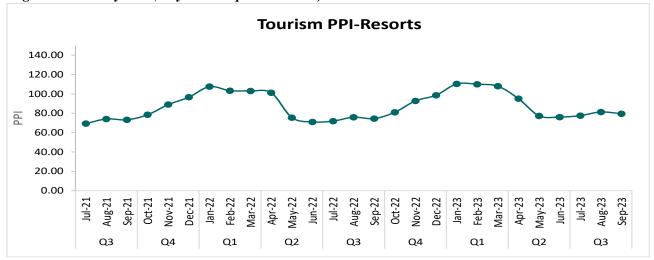

Table 11 and figure 9 illustrates that the resort sector PPI experienced ups and downs throughout the period. Seasonal fluctuations are expected in this sector with increasing prices during holiday seasons such as new year, and during winter.

During the past two years, the PPI peaked in January 2023, due to high demand by foreign tourists during Christmas and holiday season.

The Producer Price Index for Resort sector is based on accommodation prices where 3 room types have been targeted based on their revenue in the base year and availability since January 2019. The room prices take into account the common booking characteristics preferred by guests for each room type. Hence product specifications are unique for each resort.

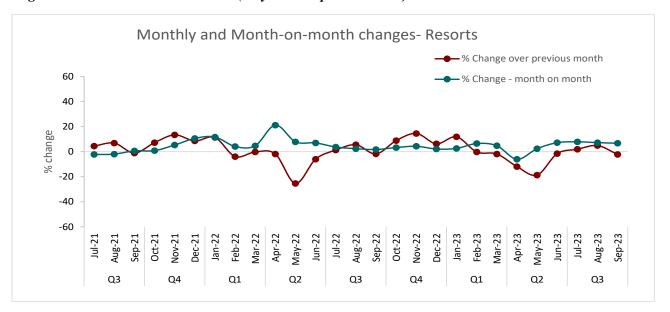

### PRICE MOVEMENT IN RESORT SECTOR (July 2021-September 2023)

Figure 9: Monthly PPI (July 2021-September 2023)

### **Resort Sector PPI**

Figure 10: PPI – Resort Sector PPI (July 2021-September 2023)

The Figure 10, show percentage change in the resort sector PPI during the past two years.

The monthly PPI for resorts varied between July and September 2023 at +1.91%, +4.85%, and -2.21% respectively. The positive growth towards August is due to holiday season in some countries. After that, price recedes to general low season level.

Between July 2021 and September 2023, the monthly growth rate in resort PPI was highest in November 2022 at +14.52. This is when the peak season begins in the tourism sector, and when the tourist arrivals in Maldives surpassed the figures prior to Covid-19. The lowest monthly growth was noted in May 2022, coinciding with the low season and travel barriers and potential loss of consumer confidence as a result of international conflicts, especially the Russia-Ukraine conflict, as both countries held major shares in the inbound tourism in Maldives.

The month-on-month prices experienced positive growth in all three months of quarter 3. Between July to September, the growth rates were +7.84%, +7.18%, and +6.73% respectively. The positive month-on-month growth reflects the increase in tourist arrivals and hence demand during the period compared to 2022.

During the past two years, the month-on-month growth rate peaked in April 2022 at +21.13%, while the lowest growth was noted in April 2023 at -6.02%. Even though low season begins in April, growth was high in April 2022 since the corresponding period in 2021 still had covid-related restrictions abroad and hence there was less inbound travel during that period.

### **PPI Information & Communication**

Price reference = January 2019 | Index reference = January 2019

### **KEY FIGURES 2023, Q3 — PPI FOR INFO & COMM**

Tab 12: Monthly & Month on month

Dec-22	70.30	0.25	-4.29
Jan-23	69.68	-0.87	-4.00
Feb-23	72.29	3.73	-0.75
Mar-23	72.63	0.47	-0.08
Apr-23	72.46	-0.23	-3.56
May-23	67.57	-6.76	-10.19
Jun-23	69.10	2.28	-6.25
Jul-23	67.06	-2.95	-7.80
Aug-23	64.92	-3.20	-6.49
Sep-23	66.79	2.88	-4.55

In 2023 quarter 3 (Q3), the Producer Price Index for Info & Comm. sector experienced fluctuations. The prices remained low in all three months of Q3 compared to 2022 (Tab 12). The month-on-month growth rate in September 2023 was at -4.55%.

### LONG TERM TREND-Info & Comm.

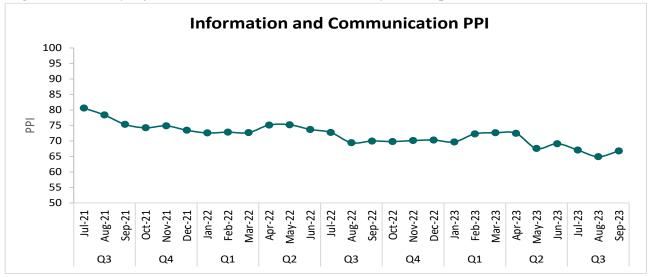

Figure 11 below illustrates the monthly changes in Information and Communication PPI over the past two years. The monthly indices experienced an overall declining trend since March 2021, with varying degrees of fluctuations over the months.

The Communication PPI trend is affected by promotional offers and seasonal rates provided to customers by the companies, usage of data and services, as well as the impact of government regulation which came into effect during quarter 4 of 2021.

This sector consists of broadcasting and telecommunication. The Information & Communication PPI is mainly influenced by changes in prices of telecommunication services.

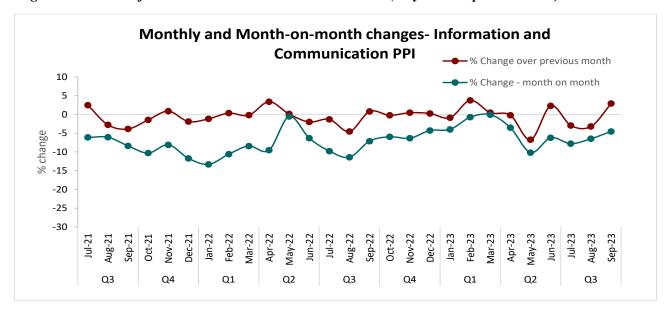

### PRICE MOVEMENT IN INFO & COMM. SECTOR-(Jul 2021-Sept 2023)

Figure 11: Monthly Information & Communication PPI (July 2021-September 2023)

### **Information and Communication**

Figure 12: PPI – Information & Communication Sector PPI (July 2021-September 2023)

The Figure 12 and Table 13, shows the monthly and month-on-month changes in prices of Information and Communication sector during the past two years.

The monthly price has had significant variations of -2.95%, -3.20% and +2.88% in July, August and September, respectively. These changes occur due to changes in promotional offers provided by the communication outlets.

Between July 2021 and September 2023, the monthly information and communication PPI growth peaked in February 2023. This may be due to removal of special promotional offers provided during new year season. The monthly growth was lowest in May 2023 coinciding with Ramdan and Eid season.

The month-on-month indices experienced some fluctuations between July to September 2023 at -7.80%, -6.49% and -4.55% respectively. This indicates that prices were relatively higher during 2022, guarter 3 compared to this year.

Throughout the past two years, the month-on-month prices of information and communication sector remained negative, indicating prices are lower compared to the corresponding period in the previous year. This indicates that the prices were very similar in both periods.

The communication sector prices are expected to vary over time due to changes in promotional offers and consumer behaviour.

### **PPI Education**

Price reference = 2018 | Index reference = December 2018

### **KEY FIGURES 2023, Q3 — PPI FOR EDUCATION**

Aug-23	123.77	0.60	5.63
Sep-23	123.77	0.00	5.63

In 2023, quarter 3 (Q3), the PPI for Education sector increased slightly. The month-on-month prices between September 2022 and 2023 experienced an increase of +5.63% (Tab 14). Education sector prices usually change at the beginning of new year or academic year.

### **LONG TERM TREND-Education**

Figure 13 below illustrates the monthly and month-on-month changes in Education PPI over the past two years.

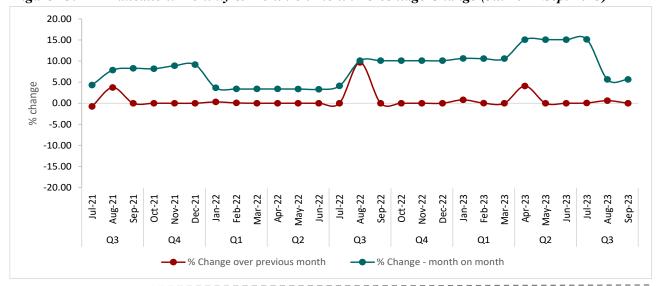

The month-on-month fluctuations prior to January 2022 signify the result of frequent price changes during Covid-19, until prices stabilized after February 2021.

The highest monthly change occurred in August 2022 at +9.67% with the start of new academic year, while the highest month-on-month change occurred in April 2023 at +15.08% due to change in government rates in some institutions.

Since January 2022, prices have stabilized. However, prices are expected to increase during new year, new academic year, new college terms or due to policy changes.

### PRICE MOVEMENT IN EDUCATION SECTOR-(July 2021-September 2023)

Figure 13: PPI Education: Monthly & Month-on-month Percentage Change (Jul 2021-Sept 2023)

### **Education Level**

Tab 16: PPI -Education Levels, and Month on month percentage change

Education levels	Sept-22	Sept-23	% Change 2022-2023
Education	117.18	123.77	5.63
Pre-primary and primary education	131.22	135.04	2.92
General secondary education	131.70	179.16	36.04
Higher Education	102.00	102.00	0.00

As illustrated in Table 16, over the twelve months, the overall education PPI increased by +5.63%. However, the general secondary education experienced a significant increase of +36.04% due to increasing price during the year. Comparatively, the price of pre-primary and primary education was more stable during the period, increasing by only +2.92%. Higher education prices remained unchanged at +0.00%.

Figure 14: PPI – Education Sector PPI (July 2021-September 2023)

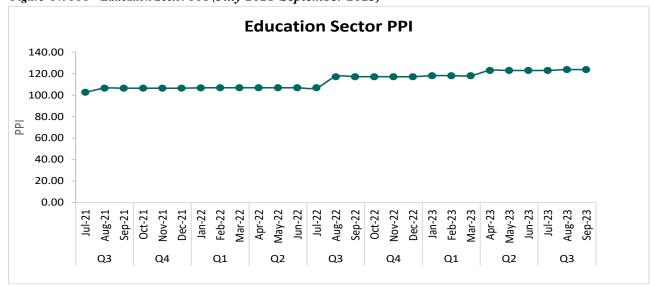

Figure 15: PPI – Preprimary and Primary Education Index (July 2021-September 2023)

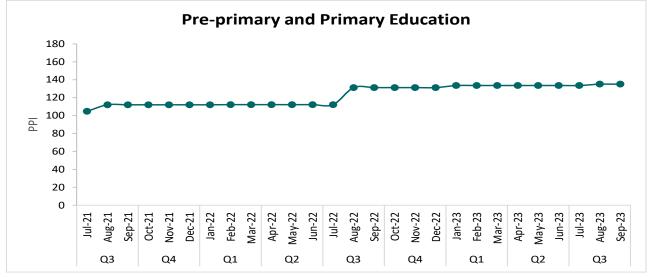

Figure 15, shows that the Producer Price Index for pre-primary and primary education usually change at the beginning of academic year. The highest monthly growth rate occurred in August 2022 at +16.98%, when several educational institutions increased their prices at the beginning of the new academic year. The monthly prices for pre-primary and primary education remained increased slightly in August 2023 at +1.10%, and remained stable in September.

### **Education** Level

Figure 16: PPI – General Secondary Education Index (July 2021-September 2023)

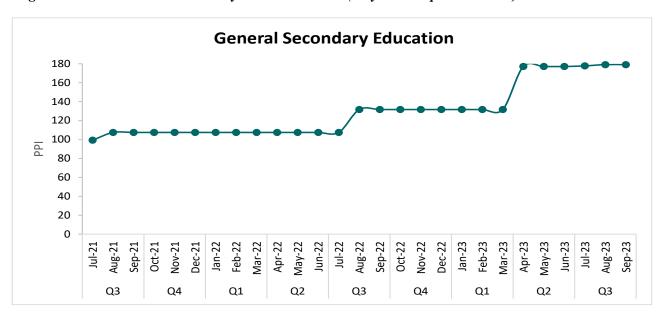

Figure 16, illustrates prices for general secondary education. It mainly changes once a year. The monthly growth rate during the period was highest in April 2023 at +34.50%. During 2023, quarter 3, prices increased slightly in July and August, by +0.37% and +0.77% respectively due to change in fees of some institutions. The month-on-month prices increased by +65.40% in July. However, it decreased to +36.04% in August 2023 and remained unchanged till September.

Figure 17: PPI – Higher Education Index (July 2021-September 2023)

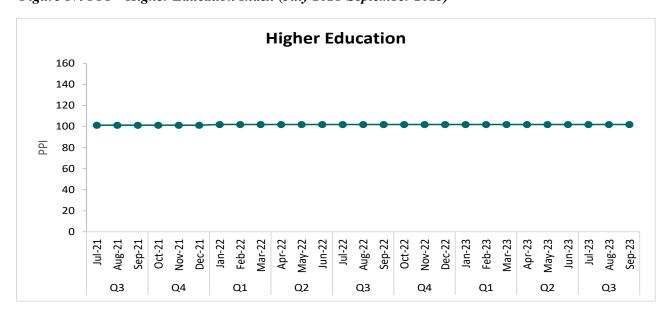

Figure 17 illustrates prices of higher education. The higher education prices have remained constant since January 2022. The month-on-month change of 0.00% in September 2023 indicates that the prices were at the same level during the year.

The higher education level has had the most steady prices since 2019. In July 2020, higher education prices returned to the pre-COVID level. Unlike pre-primary and primary, and secondary education levels, higher education institutions do not regularly revise their prices. Thus prices may remain constant for a relatively long time.

### **Future plan for PPI**

The existing PPIs will be expanded in the future. Tourism PPI will be expanded by adding guest houses and vessels categories. This will provide a better estimate of overall tourism PPI. The Information and Communication PPI would be expended by adding more disaggregated levels, while maintaining the confidentiality of data. The MBS aims at publishing the index at programming and broadcasting, and telecommunication levels once sufficient data is available.

In the long-run, the MBS intends to expand PPI by including Transportation, Fisheries, Manufacturing and Health sectors.

### What is Producer Price Index

The Producer Price Index (PPI) measures the average change over time in the prices received by domestic producers of goods and services.

The PPI provides a weighted average of price change in a group of products between one time period and another. The average price change over time cannot be directly observed and must be estimated by measuring actual prices at different points in time. Price index numbers are compiled from the collected price observations through time. PPI is an index designed to measure the average change in the price of goods and services either as they leave the place of production or as they enter the production process.

PPI with detailed industry data will serve as a leading indicator of price change in the economy. The PPI enables business owners to make a comparison of trends in their own business with those of the industry group. It can be used as an escalator to index long-term contracts for goods and services. In this case, the PPI can be used to adjust the value of the monetary amounts stipulated in the goods and services based on the increase or decrease in the level of a specific index. Additionally, PPI could be used as an important tool during the design and formulation of policies and analysis of inflation by the Maldives Monetary Authority and other governmental ministries

Price instability inherently introduces ambiguity into economic analysis and decision making, so the main use of PPI relate to efforts to reduce the uncertainty. PPI is used as a short-term indicator of inflationary trends in a wide spectrum of countries. It is also used in current cost accounting, indexation in legal contracts and as a national accounts deflator. Furthermore, it is used by researchers as well as the business community as an analytical tool to understand the situation of business.

The PPI does not represent prices at the consumer level - this is left to the Consumer Price Index (CPI). CPI is compiled on a monthly basis by Maldives Bureau of Statistics (MBS) and released every month.

Non-responding sample establishments are estimated by imputing the price changes at the establishment level or industry level. Revisions to the estimates are done upon receipts of actual reports from late respondents.

The current PPI produced by MBS is not without limitations. Those inbuilt in the system mainly arising from lack of adequate and clear information of the economic structure and players in the country, which determines the weight of the Index system and the sample frame. The limitations are stated in more detail in the methodology paper available on the website. To overcome these limitations, there is a need enhance the list of establishments in sample.

Producer' price indices are constructed from data collected through quarterly surveys of selected establishments. The establishment and product selection procedures and index calculation methods are available in the website www.statisticsmaldives.gov.mv.

### Measurement of changes in the price index

Change over previous quarter (monthly) compares the index of the month with that of the preceding month. Such comparisons measure the change in the average prices between two consecutive months. They serve as useful short- term indicators of the price movements in the non-seasonal industries.

Change over previous quarter (Quarterly) compares the index of the quarter with that of the preceding quarter. Such comparisons measure the change in the average prices between two consecutive quarters. They serve as useful short- term indicators of the price movements.

Change over same month of previous year (month on month) compares the index of the month with same month of previous year. The measure gives how an industry is growing over 12 months. It reduces the seasonality effects in the indices.

ROUNDING

Any discrepancies between totals and sum of components in this publication

are due to rounding.

**ABBREVIATIONS** 

MBS PPI Maldives Bureau of Statistics

Producer Price Index

IMF

International Monetary Fund

SUT CPI Supply and Use Table Consumer Price Index

**DEFINITIONS** 

Monthly changes:

The monthly changes compare prices of

each month with that of the preceding month. This is also referred to as change

over previous month.

Month-on-month changes:

The month-on-month values compare prices of each month with that of the cor

responding month in the previous year.

This may also be referred to as the twelve month growth rate.

**ACKNOWLEDGEMENT** 

The release of the new PPI was made possible through the generous support

of IMF South Asia Regional Training and Technical Assistance Centre (SARTTAC). Consultant from IMF, Mr. Brian Graf guided in the formulation and compilation of the index.

The entire process of data validation, compilation and updating has been done in close collaboration with all the data providing establishments.

The quarterly Producer price Index is compiled by Ms. Sajida Ahmed and Ms. Lizama Faheem; Industry Weights were developed by Ms. Aishath Hassan and Ms. Mariyam Shadeena; Publication report was prepared by Ms. Sajida Ahmed and Ms. Lizama Faheem and methodology paper was reviewed by Mr. Brian Graf.

The PPI development process was carried out under overall technical support and guidance from Mr. Brian Graf and the supervision of senior management of MBS- Ms. Aishath Shahuda and Ms. Aishath Hassan. All their valuable services are gratefully acknowledged.

The support rendered by all staff of 'National Accounts and Economics Statistics Division' are appreciable.

### **List of PPI tables**

The following tables are available in excel format in the website below this publication file:

Overall utility, electricity and water supply sectors: January 2019-June 2023
 Monthly PPI, monthly and month-on-month percentage changes
 Quarterly PPI, quarterly and quarter-on-quarter percentage changes
 Annual PPI, year-on-year percentage changes

2. Construction Sector: January 2019-June 2023

Monthly PPI, monthly and month-on-month percentage changes

Quarterly PPI, quarterly and quarter-on-quarter percentage changes

Annual PPI, year-on-year percentage changes

3. Tourism sector (resorts): January 2019-June 2023

Monthly PPI, monthly and month-on-month percentage changes

Quarterly PPI, quarterly and quarter-on-quarter percentage changes

Annual PPI, year-on-year percentage changes

4. Information and communication sector: January 2019–June 2023 Monthly PPI, monthly and month-on-month percentage changes Quarterly PPI, quarterly and quarter-on-quarter percentage changes Annual PPI, year-on-year percentage changes

5. Education sector: December 2018-June 2023

Monthly PPI, monthly and month-on-month percentage changes

Quarterly PPI, quarterly and quarter-on-quarter percentage changes

Annual PPI, year-on-year percentage changes

There will be a specific sheet for each sector. The monthly, quarterly and annual tables are in the same sheet with monthly tables to the left, annual tables to the right and quarterly tables at the center.
