# PPI Utility- Electricity, Water & Waste Management

Price reference = January 2019 | Index reference = January 2019

## KEY FIGURES 2023 Q2 PPI - Electricity, Water & Waste Management

**Tab 1: Monthly & Month on month change**

Month	PPI – Utility		% Change month-on-month
	2022	2023	
Apr*	100.96	108.43	7.40
May*	100.82	107.01	6.14
Jun*	99.45	106.81	7.40

**Tab 2: Monthly PPI and Percentage Change**

Month	PPI – Utility	% Change over previous month	% Change - month on month
Apr-22*	100.96	0.77	1.21
May-22*	100.82	-0.13	-0.79
Jun-22*	99.45	-1.36	-0.42
Jul-22*	98.67	-0.78	-1.60
Aug-22*	98.06	-0.62	-1.85
Sep-22*	97.85	-0.22	-1.95
Oct-22*	98.50	0.66	0.25
Nov-22*	98.47	-0.03	-0.01
Dec-22*	98.40	-0.07	-0.56
Jan-23*	98.72	0.32	1.11
Feb-23*	99.08	0.36	-0.16
Mar-23*	107.01	8.01	6.82
Apr-23*	108.43	1.32	7.40
May-23*	107.01	-1.31	6.14
Jun-23*	106.81	-0.19	7.40

In 2023 quarter 2 (Q2), the PPI for monthly utility experienced a decreasing trend (Tab 1, 2). The month-on-month price was positive in all three months of Q2. The growth rate for June 2023 compared to the corresponding month in 2022 was at +7.40%.

### 2023 Q2 & LONG TERM TREND

The utility PPI consists of Electricity, Water Supply and Waste Management sectors.

On the whole, the utility prices remained fairly stable with only minor fluctuations mainly caused by changes in consumption (Fig 1).

The monthly utility PPI growth varied between April to June 2023 (Tab 2) at +1.32%, -1.31%, and -0.19% respectively, while month-on-month growth was positive in all three months of 2023 Q2. During the past 2 years, the highest monthly growth occurred in March 2023 at +8.01% due to changes in price of waste management services.

The utility PPI may fluctuate even if the band rates for major sectors remain unchanged as the amount consumed affects the average unit price received by the producers.

## PRICE MOVEMENT IN UTILITY (April 2021–June 2023)

**Figure 1: Monthly PPI (April 2021–June 2023)**

\*Utility PPI has been updated : electricity -Jan 2019 –Jun 2023 ; and additional utility revision in Jan 2023 -Mar 2023

## ELECTRICITY PPI — KEY FIGURES 2023 Q2

**Tab 3: Monthly & Month on month change**

Month	PPI – Electricity		% Change month-on-month
	2022	2023	
Apr*	101.89	103.99	2.06
May*	101.72	102.45	0.72
Jun*	100.18	102.17	1.99

In 2023 quarter 2 (Q2), PPI for electricity experienced some fluctuations. The month-on-month prices also experienced some variations in all three months of 2023, Q2 (Table 3), with April having the highest growth rate of +2.06%.

**Tab 4: Monthly PPI and Percentage Change**

Month	PPI – Electricity	% Change over previous month	% Change - month on month
Apr-22*	101.89	0.80	1.18
May-22*	101.72	-0.16	-0.54
Jun-22*	100.18	-1.51	-0.30
Jul-22*	99.26	-0.92	-1.92
Aug-22*	98.45	-0.82	-2.21
Sep-22*	98.12	-0.33	-2.29
Oct-22*	99.00	0.89	-0.76
Nov-22*	98.96	-0.04	-0.24
Dec-22*	98.83	-0.13	-0.14
Jan-23*	99.38	0.56	-0.31
Feb-23*	99.83	0.45	-0.41
Mar-23*	102.52	2.70	1.42
Apr-23*	103.99	1.43	2.06
May-23*	102.45	-1.48	0.72
Jun-23*	102.17	-0.27	1.99

### LONG TERM TREND-Electricity

Overall, the electricity prices remained somewhat stable with only minor variations mainly caused by changes in consumption (Fig 2).

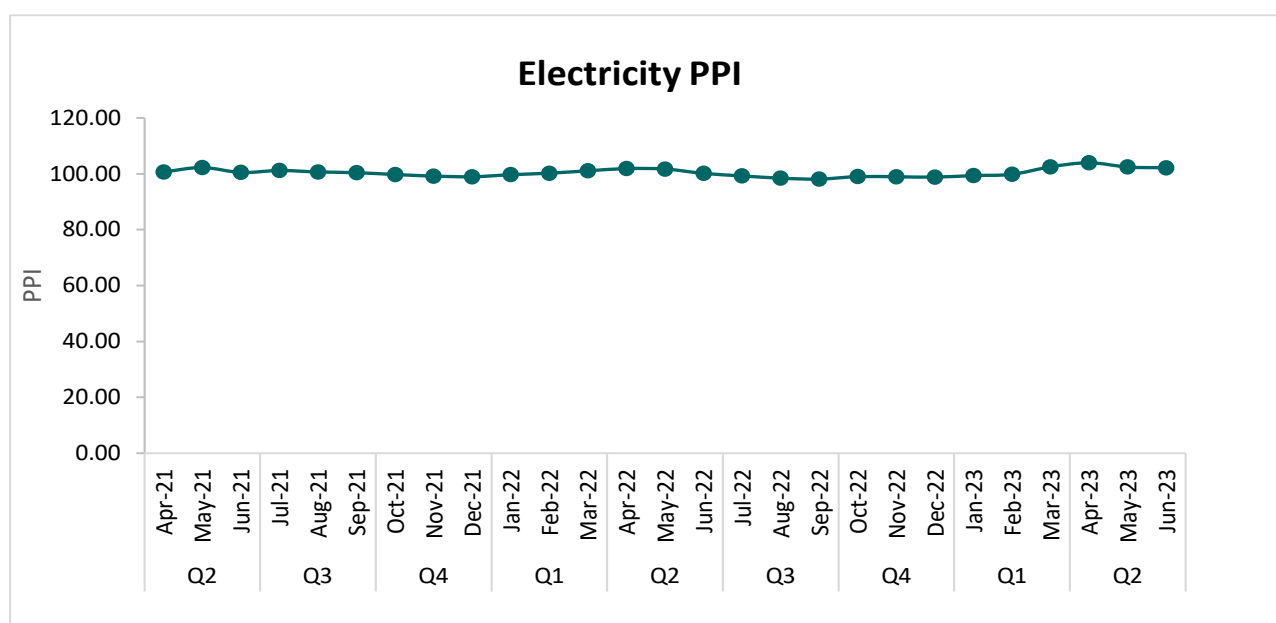

The electricity PPI appears to follow a rising trend towards the beginning of the year when the weather is warmest, fluctuating with seasonal changes, and during Ramadan.

The Producer Price Index for Electricity is based on unit prices. Thus, electricity PPI may show fluctuations even if the band rates remain unchanged.

The PPI for electricity will be affected by the amounts consumed by customers which shift them from one price band to the other, affecting the average price received by the producers.

### PRICE MOVEMENT IN ELECTRICITY (April 2021–June 2023)

**Figure 2: Monthly PPI (April 2021–June 2023)**

\*Electricity PPI has been updated from January 2019 to June 2023 during the current publication

## Electricity PPI

Figure 3: PPI – Electricity PPI (April 2021-June 2023)

The Figure 3 and table 4 illustrates percentage change in the electricity PPI during the past two years, from April 2021 to June 2023.

The monthly PPI varied between April to June 2023 at +1.43%, -1.48% and -0.27% respectively. The positive growth in April coincides with Ramadan, during which households tend to consume more electricity. In May 2023 electricity PPI declined as prices somewhat normalized after Ramadan.

The month-on-month prices in 2023 Q2 also had some variations between April and June, at +2.06%, +0.72% and +1.99% respectively. As mentioned earlier, the electricity PPI will continue to change as consumption changes. During the past two years, the month on month growth in electricity PPI was highest in April 2022, again coinciding with Ramadan, while it was lowest in September 2022 at -2.29%. This coincides with wet season which affects the consumption of electricity.

## WATER SUPPLY PPI — KEY FIGURES 2023 Q2

Tab 5: Monthly & Month on month change

Month	PPI – Water Supply		% Change month-on-month
	2022	2023	
Apr	97.20	98.17	1.00
May	97.17	96.96	-0.22
Jun	96.19	97.02	0.87

In 2023 quarter 2 (Q2), the PPI for water supply also had some fluctuations. Similarly, the month-on-month prices also varied throughout Q2 (Table 5), reaching the lowest in May 2023 at -0.22%.

Tab 6: Monthly PPI and Percentage Change

Month	PPI – Water Supply	% Change over previous month	% Change - month on month
Apr-22	97.20	0.83	1.63
May-22	97.17	-0.02	-2.04
Jun-22	96.19	-1.02	-1.03
Jul-22	95.89	-0.31	-0.55
Aug-22	95.98	0.10	-0.67
Sep-22	96.21	0.24	-0.89
Oct-22	96.02	-0.20	4.98
Nov-22	96.03	0.02	1.02
Dec-22	96.24	0.22	-2.47
Jan-23	96.01	-0.25	8.63
Feb-23	96.09	0.09	1.39
Mar-23	96.67	0.60	0.28
Apr-23	98.17	1.55	1.00
May-23	96.96	-1.23	-0.22
Jun-23	97.02	0.07	0.87

### LONG TERM TREND-Water Supply

The water supply prices remained fairly stable. During the past 12 months (Table 6, Fig 4), the most significant changes occurred in 2023, quarter two. The producers noted that changes in prices are mainly caused by changes in consumption.

The Producer Price Index for Water Supply is also based on unit prices. Thus, the PPI may show fluctuations even if the band rates remain unchanged.

The water supply PPI will also be affected by the amounts consumed by customers which shift them from one price band to the other, affecting the average price received by the producers.

### PRICE MOVEMENT IN WATER SUPPLY (April 2021–June 2023)

Figure 4: Monthly PPI (April 2021-June 2023)

## Water Supply PPI

Figure 5: PPI – Water Supply PPI (April 2021-June 2023)

The Figure 5 and table 6 show percentage changes in the water supply PPI during the past two years.

The monthly PPI for water supply varied between April to June 2023 at +1.55%, -1.23%, and +0.07% respectively. The higher PPI in April coincides with Ramadan during which households tend to consume more water. As mentioned above, the water supply PPI will continue to change with changes in consumption.

The month-on-month prices also fluctuated throughout the second quarter. Month-on-month growth rates between April to June were +1.00%, -0.22%, and +0.87% respectively.

## PPI Construction

Price reference = January 2019 | Index reference = January 2019

### KEY FIGURES 2023 , Q2 — PPI FOR CONSTRUCTION

Tab7: Monthly & Month on month change

Month	PPI –Construction		% Change month-on-month
	2022	2023	
Apr	123.21	140.51	14.04
May	123.28	140.52	13.98
Jun	123.33	140.52	13.94

Tab 8: Monthly PPI - Percentage Change

Month	PPI- Construction	% Change over previous month	% Change - month on month
Apr-22	123.21	1.50	7.83
May-22	123.28	0.05	7.85
Jun-22	123.33	0.04	7.86
Jul-22	125.24	1.55	9.48
Aug-22	125.28	0.04	9.48
Sep-22	125.33	0.04	9.48
Oct-22	127.37	1.63	8.18
Nov-22	127.46	0.07	8.17
Dec-22	127.54	0.07	8.21
Jan-23	138.09	8.27	13.84
Feb-23	138.12	0.02	13.83
Mar-23	138.17	0.03	13.82
Apr-23	140.51	1.70	14.04
May-23	140.52	0.00	13.98
Jun-23	140.52	0.00	13.94

In 2023, quarter 2 (Q2), the PPI for Construction sector has increased. The month-on-month prices between June 2022 and June 2023 experienced an increase of +13.94% (Tab 7). The import costs and general inflation play a major role in the construction prices.

### Monthly & Month-on-Month Changes

On the whole, construction PPI follows an increasing trend (Figure 7, Tab 8) with some monthly and month-on-month variations as illustrated (Fig 6) below.

In 2023, quarter 2, the monthly prices increased only in April at +1.70%, while the month-on-month prices varied between April to June 2023 at +14.04%, +13.98% and +13.64% respectively.

The producers express concern over rising prices in the construction market due to factors such as higher exchange rates, and general rise in prices and increasing labour costs.

The Construction PPI consists of building construction and road construction, carrying weights of 0.75 and 0.25 respectively. The sample is unique for each outlet depending on the type of construction carried out by each outlet.

### PRICE MOVEMENT IN CONSTRUCTION SECTOR-(April 2021–June 2023)

Figure 6: PPI Education: Monthly & Month-on-month Percentage Change (April 2021-June 2023)

## Construction PPI

**Tab 9: PPI – Construction Types, and Month on month percentage change**

Construction Types	Jun-22	Jun-23	% Change month-on-month
Construction	123.33	140.52	13.94
Building Construction	123.66	135.25	9.37
Road Construction	122.33	156.36	27.82

As illustrated in Table 9, over the twelve months, construction prices have increased significantly. The overall construction prices increased by +13.94%, while building construction and road construction increased by +9.37% and +27.82% respectively. These changes occur due to various factors increasing cost of production as mentioned above.

**Figure 7: PPI – Construction Sector PPI (April 2021-June 2023)**

**Figure 8: PPI – Building and Road Construction Index (April 2021-June 2023)**

Figure 8, shows the PPI for building and road construction. Although both building and road construction follow an increasing trend, a significant change occurred for road construction in January 2023 with a monthly increase of +27.82% while building construction increased by +2.11%. Although prices continued to vary, the monthly PPI for both building and road construction has remained stable at +0.00% in May and June 2023.

## PPI Resorts

Price reference = January 2019 | Index reference = January 2019

### KEY FIGURES 2023 Q2 — PPI RESORT SECTOR

**Tab 10: Monthly & Month on month change**

Month	PPI – Resorts		% Change month-on-month
	2022	2023	
Apr	101.20	95.11	-6.02
May	75.55	77.33	2.35
Jun	71.03	76.11	7.15

In 2023, quarter 2 (Q2), the PPI for resort sector decreased significantly. Compared to 2022 Q2, prices are mostly high in 2023 (Table 10), with June being at the peak (+7.15%). These changes occur due to changes in demand, and offers provided to attract customers .

**Tab 11: Monthly PPI and Percentage Change**

Month	PPI – Resorts	% Change over previous month	% Change - month on month
Apr-22	101.20	-1.85	21.13
May-22	75.55	-25.34	7.88
Jun-22	71.03	-5.99	6.97
Jul-22	71.92	1.26	3.69
Aug-22	75.88	5.50	2.41
Sep-22	74.51	-1.80	1.73
Oct-22	81.07	8.80	3.27
Nov-22	92.85	14.52	4.31
Dec-22	98.66	6.26	2.11
Jan-23	110.34	11.84	2.59
Feb-23	110.04	-0.28	6.47
Mar-23	108.00	-1.85	4.75
Apr-23	95.11	-11.94	-6.02
May-23	77.33	-18.69	2.35
Jun-23	76.11	-1.58	7.15

### LONG TERM TREND-Resorts

Table 11 and figure 9 illustrates that the resort sector PPI experienced ups and downs throughout the period. Seasonal fluctuations are expected in this sector with increasing prices during holiday seasons such as new year, and during winter.

During the past two years, April 2022 experienced the highest month-on-month price change (21.13%), due to recovery from covid, leading to increasing demand.

The Producer Price Index for Resort sector is based on accommodation prices where 3 room types have been targeted based on their revenue in the base year and availability since January 2019. The room prices take into account the common booking characteristics preferred by guests for each room type. Hence product specifications are unique for each resort.

### PRICE MOVEMENT IN RESORT SECTOR (April 2021–June 2023)

**Figure 9: Monthly PPI (April 2021–June 2023)**

## Resort Sector PPI

Figure 10: PPI – Resort Sector PPI (April 2021-June 2023)

The Figure 10, show percentage change in the resort sector PPI during the past two years.

The monthly PPI for resorts varied between April and June 2023 at  $-11.94\%$ ,  $-18.69\%$ , and  $-1.58\%$  respectively. The significant negative growth in April and May indicates the low season, coinciding with lower demand and greater discounts to attract customers. In June the prices were close to price level in May even though there was a slight decrease.

Between April 2021 and June 2023, the monthly growth rate in resort PPI was highest in November 2022 at  $+14.52$ . This is when the peak season begins in the tourism sector, and when the tourist arrivals in Maldives surpassed the figures prior to Covid-19. The lowest monthly growth was noted in May 2022, coinciding with the low season and travel barriers and potential loss of consumer confidence as a result of international conflicts, especially the Russia-Ukraine conflict, as both countries held major shares in the inbound tourism in Maldives.

The month-on-month prices experienced negative growth in April 2023 at  $-6.02\%$  while growth was positive in May and June 2023 at  $+2.35\%$  and  $+7.15\%$  respectively. The positive month-on-month growth reflects the increase in tourist arrivals and hence demand during the period compared to 2022.

During the past two years, the month-on-month growth rate peaked in May 2021 at  $+50.62\%$ , while the lowest growth was noted in April 2021 at  $-16.56\%$ . The May 2021 prices compare rates during Covid-19 pandemic with the prices during recovering period. The significant changes during this period, therefore, reflect the impact of Covid-19 on the tourism sector.

## PPI Information & Communication

Price reference = January 2019 | Index reference = January 2019

### KEY FIGURES 2023, Q2 — PPI FOR INFO & COMM

Tab 12: Monthly & Month on month

Month	PPI –Info & Comm.		% Change month-on-month
	2022	2023	
Apr	75.14	72.46	-3.56
May	75.23	67.57	-10.19
Jun	73.71	69.10	-6.25

In 2023 quarter 2 (Q2), the Producer Price Index for Info & Comm. sector experienced some fluctuations. The prices remained low in all three months of Q2 compared to 2022 (Tab 12). The month-on-month growth rate in June 2023 was at – 6.25%.

Tab13: Monthly PPI and Percentage Change

Month	PPI– Info & Comm	% Change over previous month	% Change - month on month
Apr-22	75.14	3.38	-9.56
May-22	75.23	0.12	-0.57
Jun-22	73.71	-2.03	-6.34
Jul-22	72.74	-1.31	-9.78
Aug-22	69.42	-4.56	-11.42
Sep-22	69.97	0.79	-7.13
Oct-22	69.81	-0.23	-5.98
Nov-22	70.12	0.45	-6.35
Dec-22	70.30	0.25	-4.29
Jan-23	69.68	-0.87	-4.00
Feb-23	72.29	3.73	-0.75
Mar-23	72.63	0.47	-0.08
Apr-23	72.46	-0.23	-3.56
May-23	67.57	-6.76	-10.19
Jun-23	69.10	2.28	-6.25

### LONG TERM TREND-Info & Comm.

Figure 11 below illustrates the monthly changes in Information and Communication PPI over the past two years. The monthly indices experienced an overall declining trend since March 2021, with varying degrees of fluctuations over the months.

The Communication PPI trend is affected by promotional offers and seasonal rates provided to customers by the companies, usage of data and services, as well as the impact of government regulation which came into effect during quarter 4 of 2021.

This sector consists of broadcasting and telecommunication. The Information & Communication PPI is mainly influenced by changes in prices of telecommunication services.

### PRICE MOVEMENT IN INFO & COMM. SECTOR-(April 2021–June 2023)

Figure 11: Monthly Information & Communication PPI (April 2021-June 2023)

## Information and Communication

Figure 12: PPI – Information & Communication Sector PPI (April 2021-June 2023)

The Figure 12 and Table 13, shows the monthly and month-on-month changes in prices of Information and Communication sector during the past two years.

The monthly price has had significant variations in May and June 2023 at  $-6.76\%$ , and  $+2.28\%$  respectively, while the change in April was only  $-0.23\%$ . These changes occur due to promotional offers provided by the communication outlets.

Between April 2021 and June 2023, the monthly information and communication PPI peaked in April 2021 coinciding with Ramadan when consumption is relatively high, while the price was lowest in May 2021 due to promotional offers provided by the telecommunication sector. This trend appears to repeat over the years.

The month-on-month indices experienced some fluctuations between April to June 2023 at  $-3.56\%$ ,  $-10.19\%$  and  $-6.25\%$  respectively.

Throughout the past two years, the month-on-month prices of information and communication sector remained negative. The most significant change occurred in May 2021 at  $-13.94\%$  coinciding with promotional offers provided by the telecommunication sector, while the least change occurred in March 2023 at  $-0.08\%$ . This indicates that the prices were very similar in both periods.

The communication sector prices are expected to vary over time due to changes in promotional offers and consumer behaviour.

## PPI Education

Price reference =2018 | Index reference = December 2018

### KEY FIGURES 2023 , Q2 — PPI FOR EDUCATION

Tab14: Monthly & Month on month change

Month	PPI -Education		% Change month-on-month
	2022	2023	
Apr	106.84	122.96	15.08
May	106.84	122.96	15.08
Jun	106.84	122.96	15.08

Tab 15: Monthly PPI - Percentage Change

Month	PPI- Education	% Change over previous month	% Change - month on month
Apr-22	106.84	0.00	3.38
May-22	106.84	0.00	3.37
Jun-22	106.84	0.00	3.30
Jul-22	106.84	0.00	4.11
Aug-22	117.18	9.67	10.08
Sep-22	117.18	0.00	10.08
Oct-22	117.18	0.00	10.08
Nov-22	117.18	0.00	10.08
Dec-22	117.18	0.00	10.08
Jan-23	118.12	0.80	10.63
Feb-23	118.14	0.02	10.57
Mar-23	118.14	0.00	10.57
Apr-23	122.96	4.08	15.08
May-23	122.96	0.00	15.08
Jun-23	122.96	0.00	15.08

In 2023, quarter 2 (Q2), the PPI for Education sector increased. The month-on-month prices between June 2022 and June 2023 experienced an increase of +15.08% (Tab 14). Education sector prices usually change at the beginning of new year or academic year.

### LONG TERM TREND-Education

Figure 13 below illustrates the monthly and month-on-month changes in Education PPI over the past two years.

The month-on-month fluctuations prior to January 2022 signify the result of frequent price changes during Covid-19, until prices stabilized after February 2021, as shown in Tab 15 and Figure 14.

The highest monthly change occurred in August 2022 at +9.67% with the start of new academic year, while the highest month-on-month change occurred in April 2023 at +15.08% due to change in government rates in some institutions.

Since January 2022, prices have stabilized. However, prices are expected to increase during new year, new academic year, new college terms or due to policy changes.

### PRICE MOVEMENT IN EDUCATION SECTOR-(April 2021–June 2023)

Figure 13: PPI Education: Monthly & Month-on-month Percentage Change (April 2021-June 2023)

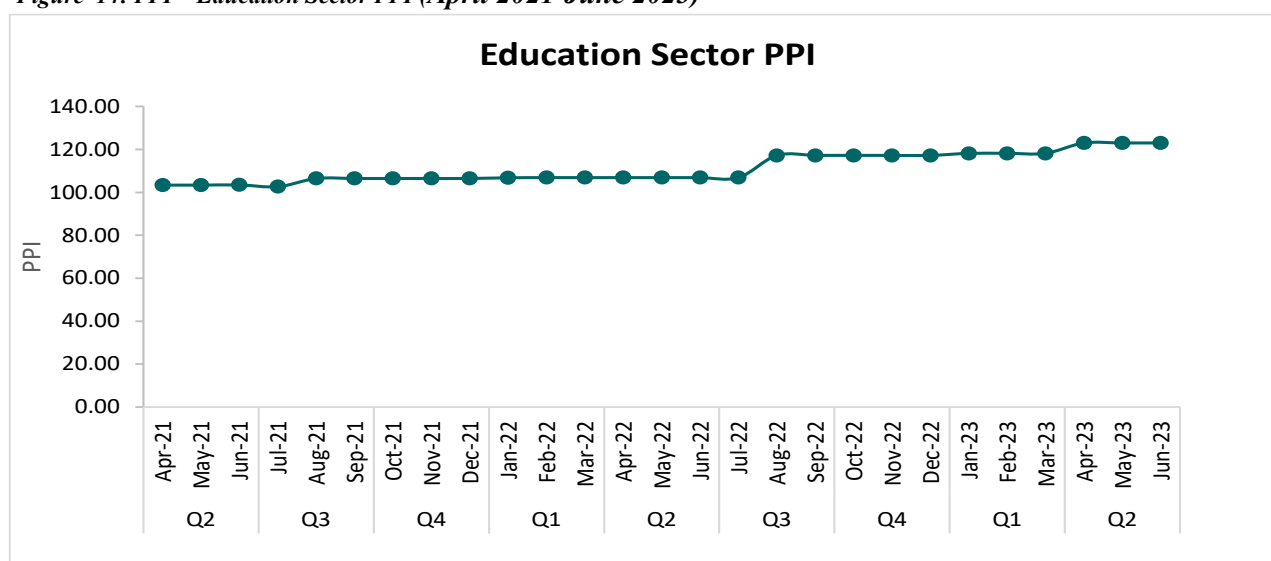

## Education Level

**Tab 16: PPI -Education Levels, and Month on month percentage change**

Education levels	Jun-22	Jun-23	% Change 2022-2023
Education	106.84	122.96	15.08
Pre-primary and primary education	112.17	133.57	19.08
General secondary education	107.49	177.14	64.79
Higher Education	102.00	102.00	0.00

As illustrated in Table 16, over the twelve months, the overall education PPI increased by +15.08%. The General secondary education, and Pre-primary and primary education experienced significant increases of +64.79% and +19.08% respectively. General secondary education shows changes in government rates provided to students in private schools. Higher education prices remained stable at +0.00%.

**Figure 14: PPI – Education Sector PPI (April 2021-June 2023)**

**Figure 15: PPI – Preprimary and Primary Education Index (April 2021-June 2023)**

Figure 15, shows that the Producer Price Index for pre-primary and primary education usually change at the beginning of academic year. The highest monthly growth rate occurred in August 2022 at +16.98%, when several educational institutions increased their prices at the beginning of the new academic year. The monthly prices for pre-primary and primary education remained unchanged in 2023, quarter two.

## Education Level

**Figure 16: PPI – General Secondary Education Index (April 2021-June 2023)**

Figure 16, illustrates that prices for general secondary education mainly changes once a year. The monthly growth rate during the period was highest in April 2023 at +34.50%. This also contributed to a +4.08% increase in the overall monthly Education PPI. The change occurred due to increase in government rates offered to students paid by government in private institutions. Due to this increase, the month-on-month change was also highest in April 2023 at +64.79%.

**Figure 17: PPI – Higher Education Index (April 2021-June 2023)**

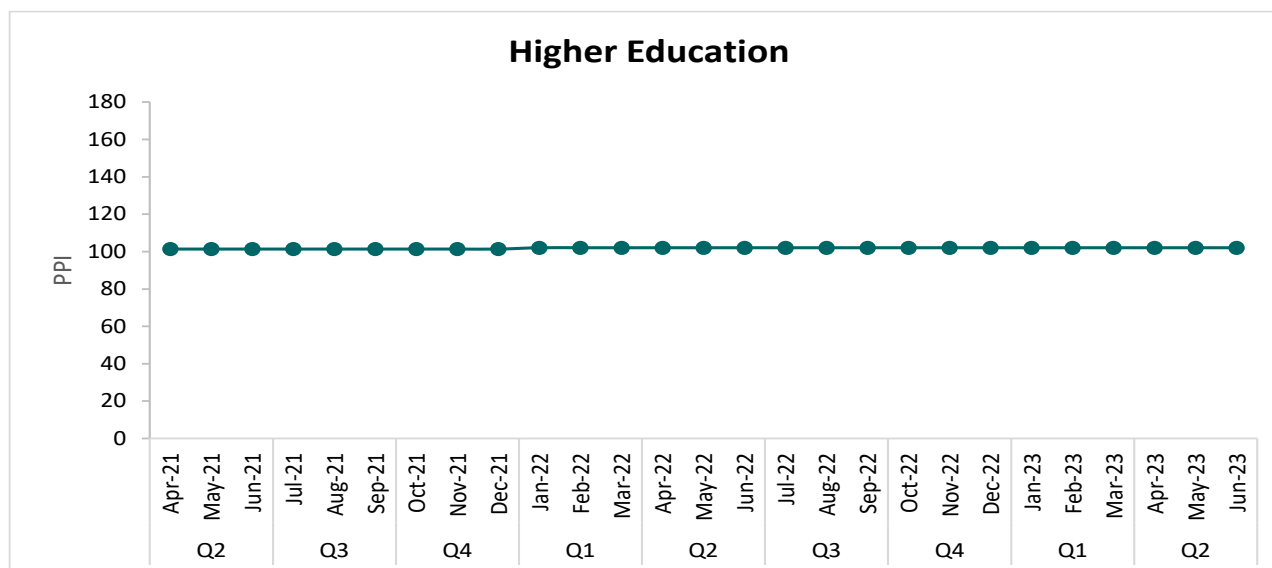

Figure 17 illustrates prices of higher education. The higher education prices have remained constant since January 2022. The month-on-month change of 0.00% in June 2023 indicates that the prices were at the same level during the period.

The higher education level has had the most steady prices since 2019. In July 2020, higher education prices returned to the pre-COVID level. Unlike pre-primary and primary, and secondary education levels, higher education institutions do not regularly revise their prices. Thus prices may remain constant for a relatively long time.

## Future plan for PPI

The existing PPIs will be expanded in the future. Tourism PPI will be expanded by adding guest houses and vessels categories. This will provide a better estimate of overall tourism PPI. The Information and Communication PPI would be expanded by adding more disaggregated levels, while maintaining the confidentiality of data. The MBS aims at publishing the index at programming and broadcasting, and telecommunication levels once sufficient data is available.

In the long-run, the MBS intends to expand PPI by including Transportation, Fisheries, Manufacturing and Health sectors.

## What is Producer Price Index

The Producer Price Index (PPI) measures the average change over time in the prices received by domestic producers of goods and services.

The PPI provides a weighted average of price change in a group of products between one time period and another. The average price change over time cannot be directly observed and must be estimated by measuring actual prices at different points in time. Price index numbers are compiled from the collected price observations through time. PPI is an index designed to measure the average change in the price of goods and services either as they leave the place of production or as they enter the production process.

PPI with detailed industry data will serve as a leading indicator of price change in the economy. The PPI enables business owners to make a comparison of trends in their own business with those of the industry group. It can be used as an escalator to index long-term contracts for goods and services. In this case, the PPI can be used to adjust the value of the monetary amounts stipulated in the goods and services based on the increase or decrease in the level of a specific index. Additionally, PPI could be used as an important tool during the design and formulation of policies and analysis of inflation by the Maldives Monetary Authority and other governmental ministries

Price instability inherently introduces ambiguity into economic analysis and decision making, so the main use of PPI relate to efforts to reduce the uncertainty. PPI is used as a short-term indicator of inflationary trends in a wide spectrum of countries. It is also used in current cost accounting, indexation in legal contracts and as a national accounts deflator. Furthermore, it is used by researchers as well as the business community as an analytical tool to understand the situation of business.

The PPI does not represent prices at the consumer level - this is left to the Consumer Price Index (CPI). CPI is compiled on a monthly basis by Maldives Bureau of Statistics (MBS) and released every month.

Non-responding sample establishments are estimated by imputing the price changes at the establishment level or industry level. Revisions to the estimates are done upon receipts of actual reports from late respondents.

The current PPI produced by MBS is not without limitations. Those inbuilt in the system mainly arising from lack of adequate and clear information of the economic structure and players in the country, which determines the weight of the Index system and the sample frame. The limitations are stated in more detail in the methodology paper available on the website. To overcome these limitations, there is a need enhance the list of establishments in sample.

Producer' price indices are constructed from data collected through quarterly surveys of selected establishments. The establishment and product selection procedures and index calculation methods are available in the website [www.statisticsmaldives.gov.mv](http://www.statisticsmaldives.gov.mv).

## Measurement of changes in the price index

Change over previous quarter (monthly) compares the index of the month with that of the preceding month. Such comparisons measure the change in the average prices between two consecutive months. They serve as useful short- term indicators of the price movements in the non-seasonal industries.

Change over previous quarter (Quarterly) compares the index of the quarter with that of the preceding quarter. Such comparisons measure the change in the average prices between two consecutive quarters. They serve as useful short- term indicators of the price movements.

Change over same month of previous year (month on month) compares the index of the month with same month of previous year. The measure gives how an industry is growing over 12 months. It reduces the seasonality effects in the indices.

## Notes

### FORTHCOMING ISSUES

**Issue (monthly)**

July - September 2023

**Release date**

30 November 2023

### ROUNDING

Any discrepancies between totals and sum of components in this publication are due to rounding.

### ABBREVIATIONS

MBS

Maldives Bureau of Statistics

PPI

Producer Price Index

IMF

International Monetary Fund

SUT

Supply and Use Table

CPI

Consumer Price Index

### DEFINITIONS

Monthly changes:

The monthly changes compare prices of each month with that of the preceding month. This is also referred to as change over previous month.

Month-on-month changes:

The month-on-month values compare prices of each month with that of the corresponding month in the previous year. This may also be referred to as the twelve month growth rate.

### ACKNOWLEDGEMENT

The release of the new PPI was made possible through the generous support of IMF South Asia Regional Training and Technical Assistance Centre (SARTTAC). Consultant from IMF, Mr. Brian Graf guided in the formulation and compilation of the index.

The entire process of data validation, compilation and updating has been done in close collaboration with all the data providing establishments.

The quarterly Producer price Index is compiled by Ms. Sajida Ahmed and Ms. Lizama Faheem; Industry Weights were developed by Ms. Aishath Hassan and Ms. Mariyam Shadeena; Publication report was prepared by Ms. Sajida Ahmed and Ms. Lizama Faheem and methodology paper was reviewed by Mr. Brian Graf.

The PPI development process was carried out under overall technical support and guidance from Mr. Brian Graf and the supervision of senior management of MBS- Ms. Aishath Shahuda and Ms. Aishath Hassan. All their valuable services are gratefully acknowledged.

The support rendered by all staff of 'National Accounts and Economics Statistics Division' are appreciable.

## List of PPI tables

The following tables are available in excel format in the website below this publication file:

1. Overall utility, electricity and water supply sectors: January 2019-June 2023

Monthly PPI, monthly and month-on-month percentage changes

Quarterly PPI, quarterly and quarter-on-quarter percentage changes

Annual PPI, year-on-year percentage changes

2. Construction Sector: January 2019-June 2023

Monthly PPI, monthly and month-on-month percentage changes

Quarterly PPI, quarterly and quarter-on-quarter percentage changes

Annual PPI, year-on-year percentage changes

3. Tourism sector (resorts): January 2019-June 2023

Monthly PPI, monthly and month-on-month percentage changes

Quarterly PPI, quarterly and quarter-on-quarter percentage changes

Annual PPI, year-on-year percentage changes

4. Information and communication sector: January 2019–June 2023

Monthly PPI, monthly and month-on-month percentage changes

Quarterly PPI, quarterly and quarter-on-quarter percentage changes

Annual PPI, year-on-year percentage changes

5. Education sector: December 2018-June 2023

Monthly PPI, monthly and month-on-month percentage changes

Quarterly PPI, quarterly and quarter-on-quarter percentage changes

Annual PPI, year-on-year percentage changes

There will be a specific sheet for each sector. The monthly, quarterly and annual tables are in the same sheet with monthly tables to the left, annual tables to the right and quarterly tables at the center.

## Appendix 1
