WHAT IS ECPI?

- ECPI is a weighted average price index of a basket of essential commodities, such as food, beverages, fuel and personal care products. The ECPI basket includes 96 products with 2,549 price quotations collected on monthly basis.
- The weightage are given as below:

Description	Republic	Male'	Atolls
Food	72.55	70.94	73.97
Beverages	12.91	14.2	11.78
Gas and other fuel	5.90	6.43	5.43
Personal care products	8.64	8.43	8.82

- It is a sub-index of Consumer Price Index

HOW ECPI WILL BE USED?

- To impose price regulations.
- Acts as an early warning system of inflation of essential commodities

MEASUREMENT OF CHANGE IN THE PRICE INDEX

Change over previous month (month-on-month) compares the index of the month with that of the preceding month. Such comparisons measure the change in the average prices between two consecutive months. They serve as useful short-term indicators of the price movements in the non-seasonal industries.

Change over same month of previous year (year-on-year) compares the index of the month with same month of previous year. The measure gives how an industry is growing over 12 months. It reduces the seasonality effects in the indices.
