Figure 1: Inflation rates of Male', August-2012

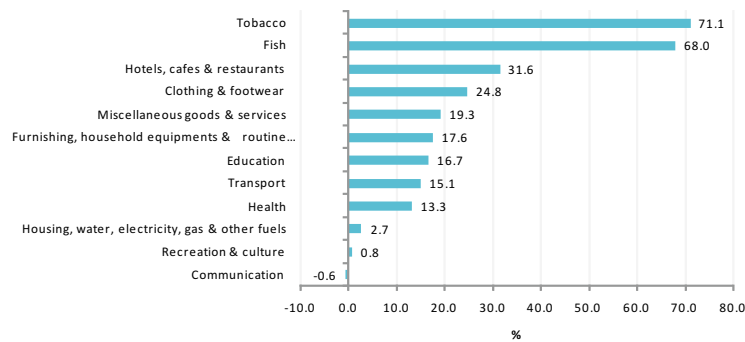

The Consumer Price Index (CPI) for Male' rose at an annualized rate of 15.04 percent in August 2012. Tobacco and fish categories showed the highest inflation followed by hotels, cafes & restaurants and clothing & footwear categories.

Annualized inflation rate is constructed by averaging index number over 12 months and then comparing 2 periods 12 month apart (e.g. 12 months ended August 2012 with 12 months ended August 2011).

This number best represents a comparison between the mid-points of both sets of averages (i.e. between February/March of both years), which is about a 6 months out of date index. Furthermore, it smoothens the series which in turn distorts the true level of price changes as expected. Hence due to these limitations, in the up-coming rebased series, the annualized inflation rates will not be published. New series is expected to release in November 2012.

Inflation rate by major categories - Annualized basis

Figure 2: Inflation by major categories in August CPI - Annualized

Meanwhile other health services such as ultra sound scan prices also increased by 3% when compared to the previous month.
