# Producer Price Index (PPI) Education Sector - Maldives

Weight Reference = 2014 | Price reference = 2018 | Index reference = Dec 2018

April-June 2021 TIME OF RELEASE: Tuesday, 31st August 2021

# **KEY FIGURES Q2, 2021 — PPI FOR EDUCATION**

PPI Monthly & Month on month change

Month	PPI -Edu	cation	% Change
IVIOITUI	2021	2020	2020-2021
Apr	103.35	102.13	1.19
May	103.36	98.23	5.22
Jun	103.43	99.39	4.07

Monthly PPI and Percentage Change

Month	PPI- Educa- tion	% Change over previ- ous month	% Change - month on month
Apr-20	102.13	-2.16	-0.27
May-20	98.23	-3.82	-4.08
Jun-20	99.39	1.18	-3.15
Jul-20	98.39	-1.01	-4.26
Aug-20	98.69	0.31	-3.97
Sep-20	98.30	-0.39	-4.34
Oct-20	98.40	0.10	-4.25
Nov 20	97.76	-0.65	-4.88
Dec 20	97.54	-0.22	-5.09
Jan-21	103.01	5.61	-1.31
Feb-21	103.35	0.32	-0.99
Mar-21	103.34	-0.01	-1.00
Apr-21	103.35	0.01	1.19
May-21	103.36	0.01	5.22
Jun-21	103.43	0.07	4.07

In quarter 2 (Q2) 2021, the PPI for Education sector is somewhat stable with less than 0.1% increase in monthly prices compared to Q1 2021. Comparing Q2 2021 with the Q2 2020, all prices are higher, with May having a peak at 5.22% with an index of 103.36 as more households paid full prices rather than discounted rates compared to April.

### **LONG TERM TREND BY Q2 2021**

Figure 1 below illustrates a slight rise in price of 0.07% in June 2021 compared to May 2021. In April and May 2021 the indices were 103.35 and 103.36 respectively with an increase of 0.01%. However, the month-on-month change shows a 4.07% increase from June 2020 to June 2021 signalling stabilization of prices over the year.

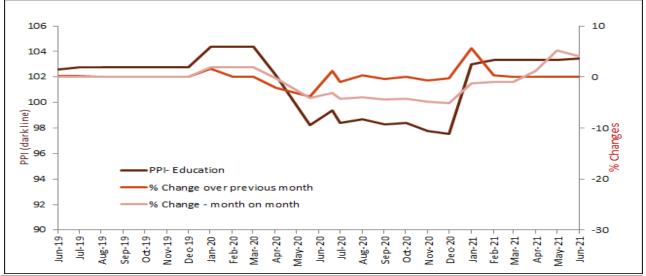

Yet, the education sector PPI is still slightly below the pre-COVID level of 104.39.

The education sector prices normally increase at the beginning of the academic year, and remain stable until a new intake is initiated.

The fluctuations during covid crisis (Figure 1) were due to various discount options offered by different institutions, which also varied between

## PRICE MOVEMENT IN EDUCATION SECTOR-(June 2019-June 2021)

Figure 1: Monthly PPI trend and Percentage Change (June 2019-June 2021)

### **Education Level**

PPI -Education Levels, and Month on month percentage change

Education levels	Jun-20	Jun-21	% Change 2020/2021
Education	99.39	103.43	4.07
Pre-primary and primary education	98.40	104.77	6.48
General Secondary Edu- cation	103.52	106.52	2.90
Higher Education	99.68	101.33	1.65

As illustrated in Figure 2, over the twelve months until June 2021, education sector PPI has risen by 4.07%, with all education levels experiencing a rise in prices. Higher education sector had the least change with an increase of 1.65% over the period. The general secondary education which includes lower and upper secondary level experienced an annual growth of 2.90%, while the PPI for pre-primary and primary education increased by 6.48% over the period.

Figure 2: PPI - Education Levels, Month on month percentage change

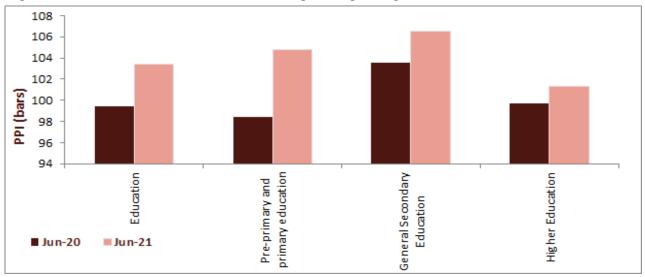

Figure 3: PPI – Preprimary and Primary Education Index (June 2019-June 2021)

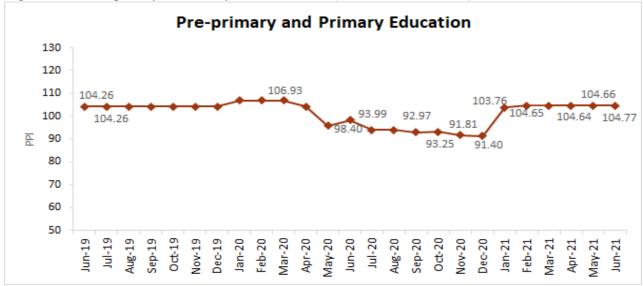

Figure 3, shows that the price of pre-primary and primary education remains within a normal range since January 2021 with monthly price changes of 0.01, 0.02, and 0.11% from April to June respectively, signaling stablization of prices and recovery from impact of COVID-19 on education sector. The month-on-month prices have increased by 6.48% in June 2021. Yet, it is still below pre-COVID level of 106.93 in March 2020.

#### **Education Level**

Figure 4: PPI – General Secondary Education Index (June 2019-June 2021) (includes Lower and Higher secondary education)

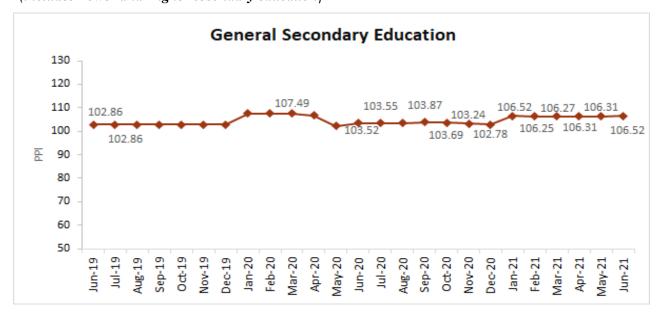

Figure 4, illustrates that prices for General Secondary Education has stabilized since January 2021. However, prices continue to fluctuate within a narrow margin in Q2 2021, with 0.03%, 0.01% and 0.20% from April to June. The month-on-month price has increased by 2.90% in June 2021. However, the current price level is below the pre-COVID index of 107.49 in March 2020.

Figure 5: PPI – Higher Education Index (June 2019-June 2021)

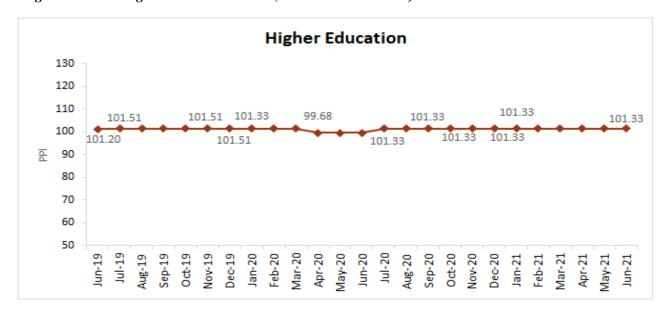

Figure 5 illustrates prices of higher education. There is no change in the higher education prices in Q2, 2021, when compared with Q1, 2021.

The higher education prices have remained somewhat steady for most of the period except from April to June 2020. The highest decline is seen in April 2020 due to discounts given to students as a result of Covid-19. However, in July 2020, higher education prices returned to the pre-Covid level.

# **PPI weights and Price collection**

The PPI for Education is introduced with a price reference of 2018 and weights were derived from Maldives Supply and Use tables (SUT) 2014. The index for Education is compiled based on 110 transections from a sample of 17 establishments.

### **Future plan for PPI**

PPI initiation works on Telecommunication sector, Water, Sewerage and Waste Management sector and Electricity sectors are ongoing. Next we will be starting Tourism sector initiation process. Currently we are in the preparation process.

#### What is Producer Price Index

The Producer Price Index (PPI) measures the average change over time in the prices received by domestic producers of goods and services.

The PPI provides a weighted average of price change in a group of products between one time period and another. The average price change over time cannot be directly observed and must be estimated by measuring actual prices at different points in time. Price index numbers are compiled from the collected price observations through time. PPI is an index designed to measure the average change in the price of goods and services either as they leave the place of production or as they enter the production process.

PPI with detailed industry data will serve as a leading indicator of price change in the economy. The PPI enables business owners to make a comparison of trends in their own business with those of the industry group. It can be used as an escalator to index long-term contracts for goods and services. In this case, the PPI can be used to adjust the value of the monetary amounts stipulated in the goods and services based on the increase or decrease in the level of a specific index. Additionally, PPI could be used as an important tool during the design and formulation of policies and analysis of inflation by the Maldives Monetary Authority and other governmental ministries

Price instability inherently introduces ambiguity into economic analysis and decision making, so the main use of PPI relate to efforts to reduce the uncertainty. PPI is used as a short-term indicator of inflationary trends in a wide spectrum of countries. It is also used in current cost accounting, indexation in legal contracts and as a national accounts deflator. Furthermore, it is used by researchers as well as the business community as an analytical tool to understand the situation of business.

The PPI does not represent prices at the consumer level - this is left to the Consumer Price Index (CPI). CPI is compiled on a monthly basis by Maldives Bureau of Statistics (MBS) and released every month.

Non-responding sample establishments are estimated by imputing the price changes at the establishment level or industry level. Revisions to the estimates are done upon receipts of actual reports from late respondents.

The current PPI produced by NBS is not without limitations. Those inbuilt in the system mainly arising from lack of adequate and clear information of the economic structure and players in the country, which determines the weight of the Index system and the sample frame. The limitations are stated in more detail in the methodology paper available on the website. To overcome these limitations, there is a need enhance the list of establishments in sample.

Producer' price indices are constructed from data collected through quarterly surveys of selected establishments. The establishment and product selection procedures and index calculation methods are available in the website www.statisticsmaldives.gov.mv.

### Measurement of changes in the price index

Change over previous quarter (monthly) compares the index of the month with that of the preceding month. Such comparisons measure the change in the average prices between two consecutive months. They serve as useful short-term indicators of the price movements in the non-seasonal industries.

Change over previous quarter (Quarterly) compares the index of the quarter with that of the preceding quarter. Such comparisons measure the change in the average prices between two consecutive quarters. They serve as useful short-term indicators of the price movements.

Change over same month of previous year (month on month) compares the index of the month with same month of previous year. The measure gives how an industry is growing over 12 months. It reduces the seasonality effects in the indices.

FORTHCOMING ISSUES

### **ACKNOWLEDGEMENT**

The release of the new PPI was made possible through the generous support

of IMF South Asia Regional Training and Technical Assistance Centre (SARTTAC). Consultant from IMF, Mr Brian Graf guided in the formulation and compilation of the index.

The entire process of data validation, compilation and updating has been done in close collaboration with all the data providing establishments.

The quarterly Producer price Index is compiled by Ms. Sajida Ahmed and Ms. Lizama Faheem; Industry Weights were developed by Ms. Aishath Hassan and Ms. Mariyam Shadheena; Publication report was prepared by Ms. Lizama Faheem and methodology paper was reviewed by Mr. Brian Graf.

The PPI development process was carried out under overall technical support and guidance from Mr. Brian Graf and the supervision of senior management of statistics division Ms. Aishath Shahuda and Ms. Aisthath Hassan. All their valuable services are gratefully acknowledged.

The support rendered by all staff of 'Prices and Economics statistics Section' and National acounts Section' are appreciable.
